Wired Shut Tarleton Gillespie, 2009-09-18 How the shift toward technical copy protection in the battle over digital copyright depends on changing political and commercial alignments that are profoundly shaping the future of cultural expression in a digital age While the public and the media have been distracted by the story of Napster warnings about the evils of piracy and lawsuits by the recording and film industries the enforcement of copyright law in the digital world has quietly shifted from regulating copying to regulating the design of technology Lawmakers and commercial interests are pursuing what might be called a technical fix instead of specifying what can and cannot be done legally with a

copyrighted work this new approach calls for the strategic use of encryption technologies to build standards of copyright directly into digital devices so that some uses are possible and others rendered impossible In *Wired Shut* Tarleton Gillespie examines this shift to technical copy protection and its profound political economic and cultural implications Gillespie reveals that the real story is not the technological controls themselves but the political economic and cultural arrangements being put in place to make them work He shows that this approach to digital copyright depends on new kinds of alliances among content and technology industries legislators regulators and the courts and is changing the relationship between law and technology in the process The film and music industries he claims are deploying copyright in order to funnel digital culture into increasingly commercial patterns that threaten to undermine the democratic potential of a network society In this broad context Gillespie examines three recent controversies over digital copyright the failed effort to develop copy protection for portable music players with the Strategic Digital Music Initiative SDMI the encryption system used in DVDs and the film industry's legal response to the tools that challenged them and the attempt by the FCC to mandate the broadcast flag copy protection system for digital television In each he argues that whether or not such technical constraints ever succeed the political alignments required will profoundly shape the future of cultural expression in a digital age

Children in the Online World Elisabeth Staksrud, 2016-05-23 What is online risk How can we best protect children from it Who should be responsible for this protection Is all protection good Can Internet users trust the industry These and other fundamental questions are discussed in this book Beginning with the premise that the political and democratic processes in a society are affected by the way in which that society defines and perceives risks *Children in the Online World* offers insights into the contemporary regulation of online risk for children including teens examining the

questions of whether such regulation is legitimate and whether it does in fact result in the sacrifice of certain fundamental human rights The book draws on representative studies with European children concerning their actual online risk experiences as well as an extensive review of regulatory rationales in the European Union to contend that the institutions of the western European welfare states charged with protecting children have changed fundamentally at the cost of the level of security that they provide In consequence children at once have more rights with regard to their personal decision making as digital consumers yet fewer democratic rights to participation and protection as digital citizens A theoretically informed yet empirically grounded study of the relationship between core democratic values and the duty to protect young people in the media sphere *Children in the Online World* will appeal to scholars and students across the social sciences with interests in new technologies risk and the sociology of childhood and youth Book The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license
