***Non-biomedical Perspectives on Pain and its Prevention and Management*** Mark I. Johnson, James Woodall, Emmanouil Georgiadis, Antonio Bonacaro, Isobel Jacob, 2024-06-06. Overreliance on the biomedical paradigm has contributed in part to illogical use of surgery and long-term opioid medication with harmful physical, psychological, social and economic consequences. Pain literature is dominated by biomedical research at the expense of a holistic understanding of the lived experience of pain. Pain practice seems overly consumed with the burden of pain at an individual level, patient-centred pain management and has neglected exploration of societal level, community-centred or environmental level, ecologically-centred solutions.
