

Exercises: Understanding Experiments (Applied Support Class Project 3)

Experiments are conducted to understand the difference between treatments and control. To get a better understanding of the difference between these types of data, we will look at the properties of each of these data systems: **EEG**, **ECG**, **MEG**, and **MEP**. These experiments are the subjects of other course assignments that follow.

Exercises

The second experimental system (ECG)

The second experimental data system was defined as an experimental and potential diagnosis for ECG. It is also the most experimental system as it is the ECG system, and is the best for all of the experiments (EEG, ECG, MEG, and MEP).
