Advances in Security and Payment Methods for Mobile Commerce Wen Chen Hu, Chung-Wei Lee, Weidong Kou, 2005-01-01 Recently the emergence of wireless and mobile networks has made possible the admission of electronic commerce to a new application and research subject mobile commerce defined as the exchange or buying and selling of commodities services or information on the Internet through the use of mobile handheld devices In just a few years mobile

commerce has emerged from nowhere to become the hottest new trend in business transactions. However, the prosperity and popularity of mobile commerce will be brought to a higher level only if information is securely and safely exchanged among end systems, mobile users, and content providers. *Advances in Security and Payment Methods for Mobile Commerce* includes high quality research papers and industrial and practice articles in the areas of mobile commerce security and payment from academics and industrialists. It covers research and development results of lasting significance in the theory, design, implementation, analysis, and application of mobile commerce security and payment. **Handbook of Research on**

Ubiquitous Computing Technology for Real Time Enterprises Mühlhäuser, Max, Gurevych, Iryna, 2008-01-31. This book combines the fundamental methods, algorithms, and concepts of pervasive computing with current innovations and solutions to emerging challenges. It systemically covers such topics as network and application scalability, wireless network connectivity, adaptability, and context aware computing, information technology security and liability, and human computer interaction. Provided by publisher. *Network World*, 1994-05-30. For more than 20 years, Network World has been the premier provider of information intelligence and insight for network and IT executives responsible for the digital nervous systems of large organizations. Readers are responsible for designing, implementing, and managing the voice, data, and video systems their companies use to support everything from business critical applications to employee collaboration and electronic commerce. **Blockchain Technology for IoE** Arun Solanki, Anuj Kumar Singh, Sudeep Tanwar, 2023-09-29. This book explores opportunities and challenges in the field of Internet of Everything (IoE) security and privacy under the umbrella of distributed ledger technologies and blockchain technology, including distributed consensus mechanisms, crypto sensors, encryption algorithms, and fault tolerance mechanisms for devices and systems. It focusses on the applicability of blockchain technology, including architectures and platforms for blockchain and IoE authentication and encryption algorithms for IoE malicious transactions detection, blockchain for forensics, and so forth. Outlines the major benefits as well as challenges associated with integration of blockchain with IoE. Describes detailed framework to provide security in IoE using blockchain technology. Reviews various issues while using distributed ledger technologies for IoE. Provides comprehensive coverage of blockchain for IoE in securing information, including encryption schemes, authentication, security issues, and challenges. Includes case studies in realistic situations like healthcare informatics, smart industry, and smart transportation. This book is aimed at researchers and graduate students in computing, cryptography, IoT, computer engineering, and networks.

Intelligent Cyber-Physical Systems for Autonomous Transportation Sahil Garg, Gagangeet Singh Aujla, Kuljeet Kaur, Syed Hassan Ahmed Shah, 2022-04-27. This book provides comprehensive discussion on key topics related to the usage and deployment of AI in urban transportation systems, including drones. The book presents intelligent solutions to overcome the challenges of static approaches in the transportation sector to make them intelligent, adaptive, agile, and flexible. The book showcases different AI deployment models, algorithms, and implementations related to intelligent cyber-physical systems (CPS).

along with their pros and cons Even more this book provides deep insights into the CPS specifically about the layered architecture and different planes interfaces and programmable network operations The deployment models for AI based CPS are also included with an aim towards the design of interoperable and intelligent CPS architectures by researchers in future The authors present hands on practical implementations deployment scenarios and use cases related to different transportation scenarios In the end the design and research challenges open issues and future research directions are provided

Self-Organization and Green Applications in Cognitive Radio Networks Al-Dulaimi, Anwer, Cosmas, John, Mohammed, Abbas, 2013-01-31 Self Organization and Green Applications in Cognitive Radio Networks provides recent research on the developments of efficient cognitive network topology The most current procedures and results are presented to demonstrate how developments in this area can reduce complications confusion and even costs The book also identifies future challenges that are predicted to arrive in the Cognitive Radio Network along with potential solutions This innovative publication is unique because it suggests green energy efficient and cost efficient resolutions to the inevitable challenges in the network
