## **Guide To Quality Management Systems For The Food Industry:**

**Guide to Quality Management Systems for the Food Industry** Ralph Early, 2012-12-06 Whenever I step into an aeroplane I cannot avoid considering the risks associated with flying Thoughts of mechanical failure pilot error and terrorist action fill my mind I try to reassure myself with statistics which tell me there is greater chance of injury crossing the road The moment the plane takes off I am resigned to my fate placing faith in pilots who are highly qualified and superbly trained for the task of delivering me safely to my destination To be a passenger in an aeroplane is to express faith in the systems used by the airline It is to express a faith in the quality of the airline's organisation and the people who work within it The same is true of surgery Thoughts of mortality are difficult to avoid when facing the surgeon's knife However faith in the surgeon's training and skill faith in the anaesthetist and theatre technicians faith in the efficient resources and quality of the hospital all help to convince that there is little need to worry Apart from flying and surgery there are many facets of life which entail risk but knowing the risks we willingly place our confidence in others to deliver us safely In the consumption of food however few of us consider the risks Everyday if we are fortunate we eat food Food sustains and gives us pleasure Food supports our social interactions

Quality Management Systems for the Food Industry A. Bolton, 2012-12-06 In recent years there has been growing pressure for consistent product quality and a need for companies to demonstrate sound quality management practices in order to meet Due Diligence requirements of both legislation and the quality assurance practices of customers It has become accepted that operating to the requirements of the international standard for quality management BS EN ISO 900 goes a long way towards meeting these needs The objective of this book is to explain the requirements of the standard to offer advice about achieving those requirements and to indicate what the assessors will look for at assessment time It is important that certification to the standard is sought to support achievement of company objectives and not the reverse and of course the standard can apply to organizations and services just as much as to companies Thus the word company in the text should be treated accordingly Illustrative material has been presented under the logo of a fictitious company Quality Food Services in this context QFS does not bear any relationship whatsoever to any identically or similarly named business that may exist Readers will find it helpful to read the book with a copy of the standard to hand and are strongly encouraged to read the complete text before taking any steps to prepare for certification to the standard
