Developing Assessments for the Next Generation Science Standards

National Research Council,Division of Behavioral and Social Sciences and Education,Board on Science Education,Board on Testing and Assessment,Committee on Developing Assessments of Science Proficiency in K-12,2014-05-29 Assessments understood as tools for tracking what and how well students have learned play a critical role in the classroom Developing Assessments for the Next Generation Science Standards develops an approach to science assessment to meet the vision of science education for the future as it has been elaborated in A Framework for K 12 Science Education Framework and Next Generation Science Standards NGSS These documents are brand new and the changes they call for are barely under way but the new assessments will be needed as soon as states and districts begin the process of implementing the NGSS and changing their approach to science education The new Framework and the NGSS are designed to guide educators in significantly altering the way K 12 science is taught The Framework is aimed at making science education more closely resemble the way scientists actually work and think and making instruction reflect research on learning that demonstrates the importance of building coherent understandings over time It structures science education around three dimensions the practices through which scientists and engineers do their work the key crosscutting concepts that cut across disciplines and the core ideas of the disciplines and argues that they should be interwoven in every aspect of science education building in sophistication as students progress through grades K 12 Developing Assessments for the Next Generation Science Standards recommends strategies for developing assessments that yield valid measures of student proficiency in science as described in the new Framework This report reviews recent and current work in science assessment to determine which aspects of the Framework s vision can be assessed with available techniques and what additional research and development will be needed to support an assessment system that fully meets that vision The report offers a systems approach to science assessment in which a range of assessment strategies are designed to answer different kinds of questions with appropriate degrees of specificity and provide results that complement one another Developing Assessments for the Next Generation Science Standards makes the case that a science assessment system that meets the Framework s vision should consist of assessments designed to support classroom instruction assessments designed to monitor science learning on a broader scale and indicators designed to track opportunity to learn New standards for science education make clear that new modes of assessment designed to measure the integrated learning they promote are essential The recommendations of this report will be key to making sure that the dramatic changes in curriculum and instruction signaled by Framework and the NGSS reduce inequities in science education and raise the level of science education for all students

Automatic Item Generation Mark J. Gierl,Thomas M. Haladyna,2013 Automatic item generation AIG represents a relatively new and unique research area

where specific cognitive and psychometric theories are applied to test construction practices for the purpose of producing test items using technology The purpose of this book is to bring researchers and practitioners up to date on the growing body of research on AIG by organizing in one volume what is currently known about this research area Part I begins with an overview of the concepts and topics necessary for understanding AIG by focusing on both its history and current applications Part II presents two theoretical frameworks and practical applications of these frameworks in the production of item generation Part III summarizes the psychological and substantive characteristics of generated items Part IV concludes with a discussion of the statistical models that can be used to estimate the item characteristics of generated items features one future application of AIG describes the current technologies used for AIG and also highlights the unresolved issues that must be addressed as AIG continues to mature as a research area Comprehensive The book provides a comprehensive analysis of both the theoretical concepts that define automatic item generation and the practical considerations required to implement these concepts Varied Applications Readers are provided with novel applications in diverse content areas e g science and reading comprehension that range across all educational levels elementary through university Guiding Students Into Information Literacy Chris Carlson, Ellen Brosnahan, 2009 Information Literacy takes readers systematically through the management of a research activity from conception to final product Each chapter includes handouts that have been used by the authors with actual research assignments websites for further information and a bibliography of additional books that support the ideas in the chapter An appendix with examples of research papers that have been done by the authors actual students is also included A Practical Guide to Bio-inspired Design Helena Hashemi Farzaneh, Udo Lindemann, 2018-07-12 Bio inspired design also called biomimetics or biomimicry is a promising approach for the development of innovative technical products not only in mechanical engineering but also in areas such as material science and even computer engineering Innovations such as humanoid robots or multifunctional materials have shown the potential of bio inspired design However in industrial companies bio inspired design remains an exotic approach which is rarely used in innovation practice One reason for this is a lack of knowledge on how to implement bio inspired design in practice Therefore this guide book was written to explain the application of bio inspired design methods and tools The target groups are professional engineers and biologists as well as students of both disciplines The book presents a selection of methods for specific activities in bio inspired design namely planning a bio inspired design project abstraction search analysis and comparison and transfer of analogies Factsheets give an overview of each method its advantages and challenges and its suitability for different bio inspired design approaches and scenarios To facilitate understanding all methods are explained with the help of the same example In addition ten best practice examples show the practical applicability of bio inspired design Guide to NIH Programs and Awards National Institutes of Health (U.S.), 1976 This publication is a compendium of the scientific programs of the entities which make the National Institutes of Health and which award such contracts and grants Arranged

under various institutes and divisions of NIH Each section contains information about areas of research programs and awards currently in force Also gives addresses for requesting applications and additional information **Mastering AI**
