Exploring the Collective Unconscious in the Age of Digital Media Schafer, Stephen Brock, 2016-01-28 For decades we have witnessed the emergence of a media age of illusion that is based on the principles of physics the multidimensionality immateriality and non locality of the unified field of energy and information as a virtual reality As a result a new paradigm shift has reframed the cognitive unconscious of individuals and collectives and generated a worldview in which mediated illusion prevails Exploring the Collective Unconscious in a Digital Age investigates the cognitive significance of an altered mediated reality that appears to have all the dimensions of a dreamscape This book presents the idea that if the digital media sphere proves to be structurally and functionally analogous to a dreamscape the Collective Unconscious researched by Carl Jung and the Cognitive Unconscious researched by George Lakoff are susceptible to research according to the parameters of hard science
