These spheres vary in size and are interconnected by thin, faint lines, creating a complex, network-like structure that resembles a molecular model or a data visualization. Handbook of Solubility Data for Pharmaceuticals Abolghasem Jouyban, 2009-08-26 Aqueous solubility is one of the major challenges in the early stages of drug discovery. One of the most common and effective methods for enhancing solubility is the addition of an organic solvent to the aqueous solution. Along with an introduction to cosolvency models, the *Handbook of Solubility Data for Pharmaceuticals* provides an extensive database. *Handbook of Aqueous Solubility Data* Samuel H. Yalkowsky, Yan He, Parijat Jain, 2016-04-19 Over the years, researchers have reported solubility data in the chemical, pharmaceutical, engineering, and environmental literature for several thousand organic compounds. Until the first publication of the *Handbook of Aqueous Solubility Data*, this information had been scattered throughout numerous sources. Now newly revised, the second edition of **Handbook of Aqueous Solubility Data** Samuel H. Yalkowsky, 2003-03-26 Over the years, researchers have reported solubility data in the chemical, pharmaceutical, engineering, and environmental literature for several thousand organic compounds. Until now, this information has been scattered throughout the literature. Containing over 16 000 solubility data points for more than 4 000 organic compounds, *Handbook of Aqueous Solubility Data* is a comprehensive and unique listing of measured aqueous intrinsic solubility, focusing on drug-like and drug-relevant molecules. The database can be used to predict the solubility of research pharmaceutical molecules. Includes downloadable files of the database in CSV format. The mining of the database can result in a better design of solubility assay protocols, leading to better quality of measurements. Artificial intelligence and Bayesian statistics will likely be key to this subject area in the future. Alex Avdeef has been an American Association of Pharmaceutical Scientists (AAPS) Fellow since 2014, a former visiting senior research fellow at King's College London, and is the author of *Absorption and Drug Development* (2nd ed, Wiley, 2012). In 2021, the book was translated into Chinese by translators affiliated with the China Food and Drug Administration. For nearly 50 years, he has been teaching, researching, and developing methods, instruments, and analysis software for the measurement of ionization constants, solubility, dissolution, and permeability of drugs. His accomplishments in the development of instrumentation include several well-known instruments that are or recently have been manufactured by leading companies in the instrument market, including Thermo Fisher Scientific Sirius Analytical and Pion Inc.
