Happiness And Economic Growth Lessons From Developing Countries Studies Of Policy Reform:

Happiness and Economic Growth Andrew E. Clark, Claudia Senik, 2014-11-20 This volume arising from a PSE CEPREMAP DIMeco conference includes contributions by some of the best known researchers in happiness economics and development economics including Richard Easterlin who gave his name to the Easterlin paradox that GDP growth does not improve happiness over the long run Many chapters underline the difficulty of increasing well being in developing countries including China even in the presence of sustained income growth This is notably due to the importance of income comparisons to others adaptation so that we get used to higher income and the growing inequality of income In particular rank in the local income distribution is shown to be important creating a beggar thy neighbour effect in happiness Wealth comparisons in China are exacerbated by the gender imbalance as the competition for brides creates a striking phenomenon of conspicuous consumption on the housing market Policy has to be aware of these effects This applies in particular to those who try to use self reported subjective well being in order to generate a social subjective poverty line which is a key issue in developing countries However the news is not only bad from the point of view of developing countries One piece of good news is that GDP growth often seems to go hand in hand with lower happiness inequality and thereby reduces the risk of extreme unhappiness

Economics and Ageing José Luis Iparraguirre, 2020-01-29 This upper level textbook provides a coherent introduction to the economic implications of individual and population ageing Placing economic considerations into a wider social sciences context this is ideal reading not only for advanced undergraduate and masters students in health economics and economics of ageing but policy makers professionals and practitioners in gerontology sociology health related sciences and social care This volume introduces topics in the economics of happiness quality of life and well being in later life It also covers questions of inequality and poverty intergenerational economics and housing Other areas described in this book include behavioural economics political economy and consumption in ageing societies

Economic Challenges and Young Adults Magdalena Osińska, 2025-06-17 In recent years there has been an unprecedented shift in the attitudes of young individuals towards the key economic issues they encounter as they embark on their adult lives Sociologists have identified two distinct generations namely Generation Y and Generation Z which exhibit behaviours contrary to those of their parents and older generations The reasons behind these shifts are shared across European countries where these generations have experienced lives characterized by peace cultural diversity globalization economic stability relative economic and social well being as well as parental care and education Addressing a gap in the economic literature this book uniquely bridges the current understanding of youth with empirical evidence specific to Central and Eastern European Countries represented by Poland and Czechia Germany was taken as an example of a Western European Country The novelty lies in identifying the contemporary trends and determinants shaping the decision making process of young adults regarding the labour market savings and investments job satisfaction retirement and sustainable consumption The book draws on a

theoretical foundation from both economic and sociological perspectives The book comprises ten interconnected chapters each contributing to the central theme of youth intentions and attitudes toward economic financial issues The summary is presented from the perspective of contemporary megatrends The target audience includes students and researchers in fields related to contemporary economic challenges such as economics psychology and sociology Given the challenges faced by young adults from post socialist states implementing the policy recommendations in the book may contribute to reducing the gap between them and their counterparts in Western European countries Institutions involved in social policy including both non governmental organizations and public entities will also find the policy implications to be of interest *The Factory-free Economy* Lionel Fontagné, Ann E. Harrison, 2017 An economic analysis of de industrialization that considers the ongoing transformation of the industrial economies and the consequences for economic policy

Charitable Giving and Tax Policy Gabrielle Fack, Camille Landais, 2016-09-01 Over the past couple of decades differentials in the level of private contributions to charitable organizations have become a central matter of public policy Because private charitable contributions finance many socially valuable activities for example education and the arts many governments have tried to boost private philanthropy through various active policy interventions Furthermore the temptation to rely on private contributions to finance the provision of public goods has increased substantially in recent years as fiscal constraints have become tighter Yet there is little robust quantitative evidence regarding the differentials in private charitable giving across countries and more importantly very little consensus on why these differentials may exist This volume provides an original comparative and historical analysis of charitable giving and of tax policies towards private philanthropy across different countries It sheds new light on the determinants of private philanthropy and offers interesting practical insights for improving tax policies towards charitable giving

Advances in Happiness Research Toshiaki Tachibanaki, 2016-01-22 This edited volume makes a contribution to the literature on happiness research by compiling studies based on cross national research and from diverse academic disciplines The book is distinctive in that it contains both theoretical and empirical analyses investigating relationship between causes of happiness and economic behavior relating to employment consumption and saving Most notably it is one of the first studies in this subject area that analyzes micro data collected in Europe US and Japan with information on respondents attributes and their economic behavior as well as in measuring inter temporal happiness by principal factor analysis Research findings in this volume shed new light on public policies for a number of areas such as employment family social welfare urban and regional planning and culture The book draws on a collaborative research project between five institutions of higher education in France UK Germany Switzerland Belgium and Japan that lasted for two years

The Rise Of The New Economic Powers And The Changing Global Landscape Haico Ebberts, 2022-12-19 This book explores the catching up process of a group of large emerging markets the New Economic Powers This process is extremely robust and should be considered as the defining trend of our age resulting in a pivotal change in world economics and politics The outcome is that

the West cannot dominate the world as it did in the previous 200 years Today s world is pluralistic and the larger emerging markets are becoming increasingly influential That is the new reality which at times caused and will cause further discomfort and uncertainty in the West In the eight chapters the viewpoints on globalization of nine New Economic Powers are discussed Each chapter is an essential element in understanding the process of globalization and the role the New Economic Powers play in it Essentially their views are guided by a fundamental different look about the role of the market and the government in society compared to what we see in the West The New Economic Powers understand the power of the market to create prosperity but at the same time emphasize the need for government interference This delicate balance is particularly visible with respect to their international trade and investment policies which bring them in conflict with Western countries and multilateral institutions such as the WTO and the IMF The book helps the reader to understand the fundamental choices made by policymakers in the New Economic Powers

Economics and Psychology Stavros Drakopoulos,Ioannis Katselidis,2023-12-01 With the rise of modern behavioural economics and increasing interest in subjective well being research the question of the relationship between economics and psychology has again been brought to the fore Drawing on the history of economic thought this book explores the historical relationship between the two disciplines The book opens with a description of the primary philosophical foundations for early arguments supporting the interplay between economics and psychology Both classical economists and other prominent pre marginalists writers are examined in this context The ensuing discussion explores the marginalist revolution and how well known economists like Jevons and Edgeworth influenced by pre marginalist writers incorporated ideas and findings from psychology The book then describes how following the so called Paretian turn early neoclassical economists attempted to expel psychological concepts from economic analysis Combined with the increasing formalization the influence of the classical physics scientific ideal and the impact of positivism this methodological stance became dominant in modern mainstream economics In contrast non mainstream traditions continued to acknowledge the significance of psychology in their economic analysis This tradition includes inter alia the so called old behavioural economics mainly of Herbert Simon and George Katona The revival of psychology in economics came mainly with the emergence and development of new behavioural economics as a distinct branch during the last few decades The trend was further assisted by the emergence of the economics of subjective well being Finally the book briefly explores the state of the current debate concerning the relationship between economics and psychology This book will be invaluable reading to anyone interested in the history of the study of economics and psychology as well as of great interest to students and scholars of history of economic thought psychological economics behavioural economics and the history and philosophy of social sciences

Pathways Out of Poverty Gary S. Fields,Guy Pierre Pfeffermann,2003-10-30 How private firms contribute to economic mobility and poverty reduction and what governments can do to enhance their contributions is the theme of this book The positive role often underemphasized the private sector plays

in economic development is looked at Also the labour market and how various mechanisms in the economy interact to affect conditions for people as workers and as consumers The links among the business environment private sector development economic growth poverty reduction and economic mobility are also examined *Pathways Out of Poverty* Gary S. Fields, 2013-12-01 Until recently development economists tended to assume a role for private enterprises in reducing poverty without articulating it explicitly How private firms contribute to economic mobility and poverty reduction and what governments can do to enhance their contribution is the theme of this book In developing countries private enterprise is far and away the largest source of employment and investment and a significant source of government revenue In addition to these tangible contributions private enterprise is an important source of less tangible but critically important factors such as openness to ideas innovation and opportunity The book presents new evidence which demonstrates the essential role which private firms are playing in the course of economic development Throughout the focus is on economic mobility Regional case studies ranging from the Far East to Sub Saharan Africa hone in on the role of entrepreneurship in development Drawing on the rich materials of the World Bank's Worldwide Business Environment Survey key policy factors are identified Special attention is paid to obstacles facing small and medium sized enterprises The concluding chapters focus on practical ways in which governments of developing and transition countries can encourage the capacity of poor people to move up the economic ladder
