Major League Baseball Expansions and Relocations Frank P. Jozsa, Jr., 2010-03-08 This study considers the importance of location for new and relocated major league franchises in the more than 130 years since the National League was founded Included are an analysis of market differences and similarities team performances and demographics and area economic comparisons Market data are used to predict future expansions and relocations of major league teams Markets Sean Dinces, 2018-11-23 An unvarnished look at the economic and political choices that reshaped contemporary Chicago arguably for the worse The 1990s were a glorious time for the Chicago Bulls an age of historic championships and all time basketball greats like Scottie Pippen and Michael Jordan It seemed only fitting that city county and state officials would assist the team owners in constructing a sparkling new venue to house this incredible team that was identified worldwide with Chicago That arena the United Center is the focus of Bulls Markets an unvarnished look at the economic and political choices that forever reshaped one of America's largest cities arguably for the worse Sean Dinces shows how the construction of the United Center reveals the fundamental problems with neoliberal urban development The pitch for building the arena was fueled by promises of private funding and equitable revitalization in a long blighted neighborhood However the effort was funded in large part by municipal tax breaks that few ordinary Chicagoans knew about and that wound up exacerbating the rising problems of gentrification and wealth stratification In this portrait of the construction of the United Center and the urban life that developed around it Dinces starkly depicts a pattern of inequity that has become emblematic of contemporary American cities governments and sports franchises collude to provide amenities for the wealthy at the expense of poorer citizens diminishing their experiences as fans and far worse creating an urban environment that is regulated and surveilled for the comfort and protection of that same moneyed elite Smart Ball Robert F. Lewis II,2010-03-05 Smart Ball follows Major League Baseball's history as a sport a domestic monopoly a neocolonial power and an international business MLB s challenge has been to market its popular mythology as the national pastime with pastoral populist roots while addressing the management challenges of competing with other sports and diversions in a burgeoning global economy Baseball researcher Robert F Lewis II argues that MLB for years abused its legal insulation and monopoly status through arrogant treatment of its fans and players and static management of its business As its privileged position eroded eroded in the face of increased competition from other sports and union resistance it awakened to its perilous

predicament and began aggressively courting athletes and fans at home and abroad Using a detailed marketing analysis and applying the principles of a smart power model the author assesses MLB s progression as a global business brand that continues to appeal to a consumer s sense of an idyllic past in the midst of a fast paced and often violent present The Economics of Industrial Organization William G. Shepherd, Joanna M. Shepherd, 2003-09-19 The study of industrial organization extends to the core of some of the most important questions of economics Who controls markets and profits from them Does competition or monopoly result in a more beneficial economy. How can the economic playing field become fairer or more biased in either direction Throughout the fields history various clashing schools of thought have attempted to sort through these complex issues examining both abstract theory and real life cases The Fifth Edition of this widely used highly regarded text includes coverage of dramatic changes in the field Shepherd and Shepherd provide broad balanced coverage of topics without showing preference to any single point of view encouraging readers to think independently This emphasis on independent judgment is evident throughout the book with discussion of structure placed before performance to assist the reader in thinking about causation Topics are organized for maximum flexibility with distinct chapters covering case studies antitrust and regulation policy and capital markets The Comparative Economics of Sport S. Szymanski, 2010-03-31 Starting with a major survey of the economics of sport this volume involves primarily a comparison of the European and American models of sport how to restructure leagues to make them more competitive the analysis of gate sharing mechanisms the economic impact of promotion and relegation and a comparison of broadcasting regimes Business of Baseball Albert Theodore Powers, 2015-10-03 The crack of the bat the cheering of fans and the agility and athleticism of the players are all characteristics that many people fondly associate with Major League Baseball However the players strike and owners lockout in 1994 and 1995 brought the game under great scrutiny revealing a side of baseball that is not admirable honorable or enjoyable Nor is this darker side of America's Pastime a recent development The majority of problems in today s Major Leagues are a continuation of ills that have plagued organized baseball since its inception This book examines the business of baseball addressing its most significant problems and proposing solutions It covers some of Major League Baseball's greatest players and their effect on the game and its business Among the many topics analyzed are the roles of franchise owners commissioners and players unions in organized baseball The book also examines Major League ballparks and baseball fans and considers how they are relevant to baseball as a game and a business Public/private Partnerships for Major League Sports Facilities Judith Grant Long, 2013 This volume takes readers inside the high stakes game of public private partnerships for major league sports facilities explaining why some cities made better deals than others assessing the best practices and common pitfalls in deal structuring and facility leases as well as highlighting important differences across markets leagues facility types public actors subsidy delivery mechanisms and urban development aspirations It concludes with speculations about the next round of facility replacement amidst rapid changes in
