Security Disarmed Barbara Sutton, Sandra Morgen, Julie Novkov, 2008 In *Security Disarmed* scholars policy planners and activists come together to think critically about the human cost of violence and viable alternatives to armed conflict Arranged in four parts alternative paradigms of security cross

national militarization militarism in the United States and pedagogical and cultural concerns the book critically challenges militarization and voices an alternative encompassing vision of human security by analyzing the relationships among gender race and militarization

The President's Czars Mitchel A. Sollenberger, Mark J. Rozell, 2012-04-27 Faced with crises that would challenge any president Barack Obama authorized pay czar Kenneth Feinberg to oversee the 20 billion fund for victims of the BP oil spill and to establish and enforce executive pay guidelines for companies that received 700 billion in federal bailout money Feinberg's office comes with vastly expansive policy powers along with seemingly deep pockets yet his position does not formally fit anywhere within our government's constitutional framework The very word czar seems inappropriate in a constitutional republic but it has come to describe any executive branch official who has significant authority over a policy area works independently of agency or Department heads and is not confirmed by the Senate or subject to congressional oversight Mitchel Sollenberger and Mark Rozell provide the first comprehensive overview of presidential czars tracing the history of the position from its origins through its initial expansion under FDR and its dramatic growth during the presidencies of George W Bush and Barack Obama *The President's Czars* shows how under pressure to act on the policy front modern presidents have increasingly turned to these appointed officials even though by doing so they violate the Appointments Clause and can also run into conflict with the nondelegation doctrine and the principle that a president cannot unilaterally establish offices without legislative support Further Sollenberger and Rozell contend that czars not only are ill conceived but also disrupt a governing system based on democratic accountability A sobering overview solidly grounded in public law analysis this study serves as a counter argument to those who would embrace an excessively powerful presidency one with relatively limited constraints Among other things it proposes the restoration of accountability starting with significant changes to Title 3 of the U S Code which authorizes the president to appoint White House employees without regard to any other provision of law Ultimately the authors argue that czars have generally not done a good job of making the executive branch bureaucracy more effective and efficient Whatever utility presidents may see in appointing czars Sollenberger and Rozell make a strong case that the overall damage to our constitutional system is great and that this runaway practice has to stop

Immigration Phobia and the Security Dilemma Mikhail A. Alexseev,2006 Immigration phobia is a paradoxical global phenomenon neither theories that link conflict to symbolic and realistic threats nor the contact hypothesis can systematically explain intense anti migrant alarmism and exclusionism toward marginally small migrant minorities Through a careful comparative study of immigration attitudes in the Russian Far East the EU and the United States this book is the first to demonstrate that concerns about national identity and economic interests associated with migration are themselves ignited by a unique perceptual logic of the security dilemma Regression analysis and case studies trace support for expulsion of migrants to human yearning for pre emptive self defense under uncertainty Alarmism and hostility arise from ambiguities about immigration consequences and migrants motivations Framing migration as a national security problem is therefore logical but counterproductive The book instead recommends managing migration through economic incentives and new institutions at the global national and local level

Daughters and Granddaughters of Farmworkers Barbara Wells, 2013-11-15 In *Daughters and Granddaughters of Farmworkers* Barbara Wells examines the work and family lives of Mexican American women in a community near the U S Mexican border in California s Imperial County Decades earlier their Mexican parents and grandparents had made the momentous decision to migrate to the United States as farmworkers This book explores how that decision has worked out for these second and third generation Mexican Americans Wells provides stories of the struggles triumphs and everyday experiences of these women She analyzes their narratives on a broad canvas that includes the social structures that create the barriers constraints and opportunities that have shaped their lives The women have constructed far more settled lives than the immigrant generation that followed the crops but many struggle to provide adequately for their families These women aspire to achieve the middle class lives of the American Dream But upward mobility is an elusive goal The realities of life in a rural agricultural border community strictly limit social mobility for these descendants of immigrant farm laborers Reliance on family networks is a vital strategy for meeting the economic challenges they encounter Wells illustrates clearly the ways in which the long shadow of farm work continues to permeate the lives and prospects of these women and their families

Continental Divide Krista Schlyer, 2012 The topic of the border wall between the United States and Mexico continues to be broadly and hotly debated on national news media by local and state governments and even over the dinner table By now broad segments of the population have heard widely varying opinions about the wall s effect on illegal immigration international politics and the drug war But what about the wall s effect on animals Krista Schlyer vividly shows us that this largely isolated natural area stretching from the Pacific Ocean to the Gulf of Mexico is also host to a number of rare ecosystems

Beyond Citizenship and the Nation-State Jocelyn M. Boryczka, Sarah M. Surak, 2023-06-05 *Beyond Citizenship and the Nation State* examines tensions between a push for clear boundaries defining nation states and who legitimately belongs in them and a pull away from citizenship as capturing what membership in a political community looks like in the twenty first century Borders signify and represent these physical and metaphorical challenges in a world where anti migration and anti refugee rhetoric are central to the production and reproduction of postcolonial and nationalist political discourse and identity formation With an expansive view of citizenship authors challenge dominant narratives explore alternatives to neoliberal frameworks and link theory and practice through

participatory opportunities for non citizen political participation In doing so they present possibilities for reimagining citizenship for a just more sustainable future This book will appeal to academics and practitioners working in the disciplines of Sociology Social Policy Human Geography Political Sciences Citizenship Studies and Migration Studies It was originally published as a special issue of New Political Science

The Practice of Global Citizenship Luis Cabrera,2010-10-14 In this novel account of global citizenship Luis Cabrera argues that all individuals have a global duty to contribute directly to human rights protections and to promote rights enhancing political integration between states The Practice of Global Citizenship blends careful moral argument with compelling narratives from field research among unauthorized immigrants activists seeking to protect their rights and the Minuteman activists striving to keep them out Immigrant rights activists especially those conducting humanitarian patrols for border crossers stranded in the brutal Arizona desert are shown as embodying aspects of global citizenship Unauthorized immigrants themselves are shown to be enacting a form of global civil disobedience claiming the economic rights central to the emerging global normative charter while challenging the restrictive membership regimes that are the norm in the current global system Cabrera also examines the European Union seeing it as a crucial laboratory for studying the challenges inherent in expanding citizen membership

I Don't Cry, But I Remember Joyce Lackie,2012-11-01 When Viviana Salguero came to the United States in 1946 she spoke very little English had never learned to read or write and had no job skills besides housework or field labor She worked eighteen hour days and lived outdoors as often as not And yet she raised twelve children shielding them from her abusive husband when she dared and shared in both the tragedies and accomplishments of her family Through it all Viviana never lost her love for Mexico or her gratitude to the United States for what would eventually become a better life Though her story is unique Viviana Salguero could be the mother grandmother or great grandmother of immigrants anywhere struggling with barriers of gender education language and poverty In I Don t Cry But I Remember Joyce Lackie shares with us an intimate portrait of Viviana s life Based on hours of recorded conversations Lackie skillfully translates the interviews into an engaging revealing narrative that details the migrant experience from a woman s point of view and fills a gap in our history by examining the role of women of color in the American Southwest The book presents Viviana s life not only as a chronicle of endurance but as a tale of everyday resistance What she lacks in social confidence political strength and economic stability she makes up for in dignity faith and wisdom Like all good oral history Salguero s accounts and Lackie s analyses contribute to our understanding of the past by exposing the inconsistencies and contradictions in our remembrances This book will appeal to ethnographers oral historians students and scholars of Chicana studies and women s studies as well as general readers interested in the lives of immigrant women

Justice, Power and the Political Landscape Kenneth Olwig,Donald Mitchell,2019-07-09 Landscape is now on the agenda in a new way The increasing interest in justice power and the political landscape expresses a sea change occurring in the meaning of landscape itself from landscape as scenery to landscape as polity and place As

Lionella Scazzosi argues The meaning of the term landscape has become broader than that of a view or panorama which characterized many national protection laws and policies until the middle of the 20th century and that of environment or nature to which it has often been limited during the recent years of environmentalist battles This is reflected in the new European Landscape Convention for which Landscape means an area as perceived by people The tide thus has turned towards J B Jackson s view of landscape as not a scenic or ecological entity but as a political or cultural entity changing in the course of history It is in this socio political context that it becomes necessary to consider the role of power and the importance of justice in the shaping of the landscape as an area of practice and performance with both cultural and environmental implications This book was previously published as two special issues of Landscape Research

Transborder Lives Lynn Stephen,2007-06-13 Lynn Stephen s innovative ethnography follows indigenous Mexicans from two towns in the state of Oaxaca the Mixtec community of San Agust n Atenango and the Zapotec community of Teotitl n del Valle who periodically leave their homes in Mexico for extended periods of work in California and Oregon Demonstrating that the line separating Mexico and the United States is only one among the many borders that these migrants repeatedly cross including national regional cultural ethnic and class borders and divisions Stephen advocates an ethnographic framework focused on transborder rather than transnational lives Yet she does not disregard the state She assesses the impact migration has had on local systems of government in both Mexico and the United States as well as the abilities of states to police and affect transborder communities Stephen weaves the personal histories and narratives of indigenous transborder migrants together with explorations of the larger structures that affect their lives Taking into account U S immigration policies and the demands of both commercial agriculture and the service sectors she chronicles how migrants experience and remember low wage work in agriculture landscaping and childcare and how gender relations in Oaxaca and the United States are reconfigured by migration She looks at the ways that racial and ethnic hierarchies inherited from the colonial era hierarchies that debase Mexico s indigenous groups are reproduced within heterogeneous Mexican populations in the United States Stephen provides case studies of four grass roots organizations in which Mixtec migrants are involved and she considers specific uses of digital technology by transborder communities Ultimately Stephen demonstrates that transborder migrants are reshaping notions of territory and politics by developing creative models of governance education and economic development as well as ways of maintaining their cultures and languages across geographic distances

An Introduction to Population Geographies Holly R. Barcus,Keith Halfacree,2017-09-01 *An Introduction to Population Geographies* provides a foundation to the incredibly diverse topical and interesting field of twenty first century population geography It establishes the substantive concerns of the subdiscipline acknowledges the sheer diversity of its approaches key concepts and theories and engages with the resulting major areas of academic debate that stem from this richness Written in an accessible style and assuming little prior knowledge of topics covered yet drawing on a wide range of diverse academic literature the book s

particular originality comes from its extended definition of population geography that locates it firmly within the multiple geographies of the life course. Consequently issues such as childhood and adulthood, family dynamics, ageing, everyday mobilities, morbidity and differential ability assume a prominent place alongside the classic population geography triumvirate of births, migrations and deaths. This broader framing of the field allows the book to address more holistically aspects of lives across space often provided little attention in current textbooks. Particular note is given to how these lives are shaped through hybrid social, biological and individual arenas of differential life course experience. By engaging with traditional quantitative perspectives and newer qualitative insights, the authors engage students from the quantitative macro scale of population to the micro individual scale. Aimed at higher level undergraduate and graduate students, this introductory text provides a well developed pedagogy including case studies that illustrate theory, concepts and issues.
