Cryopreservation in Assisted Reproduction Zsolt Peter Nagy, Alex C. Varghese, Ashok Agarwal, 2024-07-15 Cryopreservation of oocytes sperm and ovarian and testicular tissues as well as embryos is one of the most critical procedures to preserve the reproductive capacity of individuals. It is an indispensable part of assisted reproductive technologies as nearly all IVF clinics around the world have embraced the freeze all embryo strategy with no fresh embryo transfers. Advanced platforms such as automation and artificial intelligence are making their way into all aspects of assisted reproductive technologies including reproductive tissue banking process and storage. At the same time lax regulations and lack of training combined with rapid demands of IVF services have resulted in a climate of frequent disaster and catastrophic incidents from the cryo labs that store thousands of patients embryos for years. With the onset of malpractice lawsuits against the clinics and awards of large compensation to the patients regulations are getting stricter in this arena to safeguard the integrity of storage systems and industry leaders are developing advanced devices and alarm systems to remotely monitor storage systems exploring the power of internet AI and automation. Therefore there is an urgent need for a comprehensive text in this field based on the introduction of such a wide array of advanced devices newer technologies regulatory frameworks risks and disaster management options. With contributions from top internationally recognized scientists and clinicians with expertise in cryopreservation and reproductive technology this book provides a comprehensive overview of the basics of cryobiological processes and a technically detailed presentation on all aspects of cryopreservation of reproductive cells and tissues. It presents the current well established procedures as well as novel techniques with the latest innovations described in detail. Bringing together the latest information with key thought leaders in the field Cryopreservation in Assisted Reproduction is intended to be the go to resource for all reproductive medicine clinicians embryologists lab technologists IVF lab directors managers and researchers.

Fotografia con reflex digitali Marco Rocchi, 2019-07-05 Anni fa ho iniziato a occuparmi di fotografia digitale e ovviamente ho acquistato diversi manuali. Ho notato che generalmente si dà per scontato che tutti abbiano già la conoscenza delle nozioni di base. Il linguaggio utilizzato

quasi mai alla portata di chi veramente inizia da zero Da qui l'idea di proporre un manuale suddiviso in due parti in cui la esposizione dei vari temi mantenuta ad un livello comprensibile e nel contempo abbastanza esteso Nella prima parte sono descritti attrezzature e principi dell'esposizione oltre alle ottiche e al concetto di composizione La seconda parte dedicata alla fotografia di paesaggio con descrizioni dettagliate del come si fa e con molte fotografie a corredo Infine una parte dedicata all'editing con esempi pratici di sviluppo dei negativi digitali e di conversione in bianco e nero Sono consapevole che questo mio lavoro non certamente esaustivo e nemmeno ne ha la pretesa Il suo scopo di fornire spunti e informazioni utili a superare le difficoltà che tutti abbiamo avuto soprattutto all'inizio
