HOW TO POSE... HEADSHOTS & HANDS

World

LOOK DOWN

Ask your model to look down to give the shot a thoughtful mood and focus attention on the hands.
Top tip: Use strong eye makeup and shoot this from above to get a better view of the lashes.

WANDERING HANDS

Ask your model to bring their hands up to their face, with fingers on one hand resting on the palm of the other, and chin lowered down.
Top tip: Whites under each iris give eyes impact.

SIT DOWN

Ask the model to sit side-on, resting the elbows on the knees and with hands underneath the chin.
Top tip: Hands create a nicer shape if side-on rather than flat, with fingers gently curled.

ONE-HANDED

Ask your model to stand side-on, with her chin angled towards the front shoulder, then bring one hand up to delicately brush the cheek.
Top tip: Crop the shot close to the hairline.

SIMPLE BUT STRONG

A straightforward close-up is classic. Ask the model to look directly at the camera, lips slightly parted.
Top tip: Try a very shallow depth of field for this; as they're straight on, both eyes should be sharp.

WINDSWEPT

Ask the model to stand side-on, then use an electric fan to blow the hair across the face.
Top tip: Moving hair makes composing, focusing and expressions tricky, so take plenty of shots.

ENLIGHTENED

Ask your model to look up and to the side, and bring the hands up to the face, to create a reflective mood.
Top tip: Eyes right suggests a more hopeful mood, while eyes left looks more contemplative.

PERFECT SYMMETRY

Bring both hands together at the wrist with fingers on each cheek to create a symmetrical frame.
Top tip: Angle the face towards your light source for good catchlights and flattering light.

FRAME THE FACE

Bring one hand up to the chin, with the other arm resting on top of the head to frame the face.
Top tip: Think about how to pose the hair to create a natural frame for the face.

Photographer **The Photographer's Guide to Posing** Lindsay Adler, 2017-05-03 When photographing people you can have a great composition perfect light and the right camera settings but if your subject doesn't look right if the pose is off the shot will not be a keeper Posing is truly a crucial skill that photographers need to have in order to create great photographs If you're looking to improve your ability to pose your subjects whether they're men women couples or groups best selling author and photographer Lindsay Adler's *The Photographer's Guide to Posing Techniques to Flatter Everyone* is the perfect resource for you In the first half of *The Photographer's Guide to Posing* Lindsay discusses how the camera sees and thus how camera angle lens choice and perspective all affect the appearance of your subject Lindsay then covers things that ruin a pose such as placement of the hands and your subject's expression and posture Next Lindsay dives into posing essentials outlining her approach to start with a base pose then build on that to create endless posing opportunities She also discusses posing the face with specific sections dedicated to the chin jaw eyes and forehead as well as posing hands In the second half of the book Lindsay dedicates entire chapters to posing specific subject matter women men couples curvy women families and small groups and large groups In each chapter Lindsay addresses that subject matter's specific challenges provides go-to poses you can always use and covers how to train the eye to determine the best pose for your subject's Lindsay also teaches you how to analyze a pose so that you can create endless posing opportunities and continuously improve your work *The Photographer's Guide to Posing* Lindsay Adler, 2017 If you're looking to improve your ability to pose your subjects whether they're men women couples or groups this invaluable guide is the perfect resource for you *Step-by-Step Lighting for Outdoor Portrait Photography* Jeff Smith, 2014-04-15 There are many aspects to professional photography composition camera angles exposure color balance posing and lighting just to name a few However while each of these aspects of photography is important in the creation of a professional portrait lighting presents a special challenge that is part art and part science When the two come together effectively the results are stunning when any one aspect of the recipe falls short the result is a poor exposure or a downright unflattering look On the artistic side of the scale lighting is one of the primary tools for setting the mood of the portrait It can communicate a sense of bright airy ease or sharp dramatic tension or anything in between Determining what look is right for the client and for their intended use of the resulting portraits is a key decision From there the photographer can begin to use light to sculpt the subject's features minimizing problem areas or accentuating the subject's best features through the selection of light modifiers and the positioning of the lights themselves Moving to the technical side outdoor lighting presents particular challenges but also some significant advantages Outdoors photographers shoot at least partially with natural light While this is most of the day an abundant light source it is largely out of the control of the photographer The light can change from moment to moment as clouds pass between the earth and sun It also changes continually throughout the day as the sun moves across the sky Since he can't completely control the light the photographer must be prepared to adapt his subject's pose and position to create flattering results with the light as is

Alternately the photographer can tweak the lighting by augmenting the sunlight with flash or reflectors or even softening it using scrim or other diffusers. Of course this leaves another major concern the background. Even if the light on the subject can be perfected rarely can the photographer also control the light on an area as large as the background making it a major concern in the process of posing and lighting. So given all this why would any photographer choose to make portraits outside? One advantage is that the lighting and scenes are free making outdoor photography a great starting point for those entering the field. Even established studios however have found that clients simply like the natural timeless look of outdoor portraits. This makes them strong sellers. Additionally most portrait subjects are more at ease in natural light than when seated in front of bright noisy studio flash units and relaxed subjects translate into better expressions and better overall portraits. In this book Smith takes you through the process of lighting outdoor portraits from start to finish covering both the artistic and technical aspects of achieving success. Short one or two page lessons are amply illustrated to guide the reader through each phase. In many cases before and after images or image sequences showing variations and alternative approaches are presented to facilitate learning. Readers are encouraged to have this book with them during practice sessions and work on replicating or refining the provided examples creating a self study course in the art of lighting for outdoor portrait photography.

Photographer's Guide to Posing, 1st Edition Lindsay Adler, 2017. When photographing people you can have a great composition, perfect light and the right camera settings but if your subject doesn't look right if the pose is off the shot will not be a keeper. Posing is truly a crucial skill that photographers need to have in order to create great photographs. If you're looking to improve your ability to pose your subjects whether they're men, women, couples or groups, best-selling author and photographer Lindsay Adler's *The Photographer's Guide to Posing Techniques to Flatter Everyone* is the perfect resource for you. In the first half of *The Photographer's Guide to Posing* Lindsay discusses how the camera sees and thus how camera angle, lens choice and perspective all affect the appearance of your subject. Lindsay then covers the five most important things that ruin a pose such as placement of the hands and your subject's expression and posture. If you can look out for and avoid these five things your skills and your images will quickly improve. Next Lindsay dives into posing essentials outlining her approach to start with a base pose then build on that to create endless posing opportunities. She also discusses posing the face with specific sections dedicated to the chin, jaw, eyes and forehead as well as posing hands. In the second half of the book Lindsay dedicates entire chapters to posing specific subject matter: women, men, couples, curvy women, families and small groups and large groups. In each chapter Lindsay addresses that subject matter's specific challenges, provides five go-to poses you can always use and covers how to train the eye to determine the best pose for your subject. In the final chapter of the book Lindsay brings it all together as she teaches you how to analyze a pose so that you can create endless posing opportunities and continuously improve your work.
