

This necropsy protocol respects the different traditional incision and observation planes, as well as the sampling methods for further studies.

2.66 Growing pig showing necrotic area, lethargy and fever. May be caused by classical swine fever (CSF, African). Similar clinical signs can be observed in African swine fever and in leptospirosis.

2.68 Growing pig. Lesion and necrosis in the snout area. This may be due to African swine fever (ASF) which also presents vesicles which are easily ruptured leaving necrosis or ulcers.

2.67 Killed piglets. Post-mortem lesions. Note discoloring and abnormality of the snout as a consequence of atrophic and chronic catarrhal inflammation.

2.69 Growing pig. Lesions in the snout area following the formation of vesicles. Another example of African swine fever (ASF).

Feldman, John Curtis Seely, 1988-03-31 This laboratory guidebook provides step by step procedures that will aid in the dissection and collection of major organs and tissues of the most common species of small animals used in biomedical research Through extensive use of photographs and illustrations the dissector is guided through a complete necropsy of each species for the purpose of collecting the organs and tissues routinely examined by pathologists The techniques described will enable the technician to perform necropsies on almost any mammal in a precise and logical sequence and to properly collect tissue in order to avoid diagnostic errors Morphological differences among the various species are discussed **The Laboratory Pig** Kirsten Rosenmay Jacobsen, Aage K Olsen Alstrup, Axel K. Hansen, Peter Bollen, 2025-02-14 Since the popular second edition of The Laboratory Swine was published more than a decade ago the number of pigs used in toxicity studies has increased as an alternative to commonly used non rodent species while at the same time large developments have been made in welfare concepts of laboratory animals Pigs have gained prominence in both basic and applied research leading to a significant increase in publication activity This third

edition summarizes these new insights raising the bar for humane care and use of pigs from agricultural sources to genetically and microbiologically defined minipigs. Aimed at animal caretakers, technicians, laboratory animal veterinarians, and investigators planning and performing studies on pigs, it provides an overview with extensive references for further study. The book has been updated with a special focus on refined methods for housing and handling pigs, including an updated description of commonly performed experimental and surgical procedures. Continuing its legacy as the premier reference on the care and use of pigs in the laboratory, the small, practical, and accessible format makes this an easy go-to book with easy-to-find information and high-quality color images. The third edition aims to contribute to humane use and care for laboratory pigs in all aspects of housing, husbandry, veterinary care, and experimental techniques.

Swine Production and Health Management Umesh Dimri, M. C. Sharma (Veterinary scientist), 2013-06-15. This book on swine production, health, and management emphasizes the swine rearing in totality. The authors have added expertise to all areas of the book. Swine, if reared under modern scientific methods, may provide significant economic benefits to its owner. Management, housing, knowledge about its anatomy and physiology, breeding, reproduction, nutrition, feeding, health, disease, production, products, marketing, and economics are the facets which one needs to be well aware of to get optimum profitable return from this animal. The authors have tried to cover pig as an individual unit as well as an industry enterprise. Considering the importance of swine in the field of veterinary and animal sciences, this book has been written to provide a more academic, scientific, and field-oriented approach, thus making it suitable to the needs of academicians, scientists, students, field practitioners, and the general reader. Newer aspects of swine husbandry are described with elaborate suggested reading references to aid in further reading.
