Handbook Of The Psychology Of Aging Sixth Edition Handbooks Of Aging:

Handbook of the Psychology of Aging James E. Birren, K. Warner Schaie, Ronald P. Abeles, Margaret Gatz, Timothy A. Salthouse, 2006 The Handbook of the Psychology of Aging provides a definitive reference source for information on the psychology of adult development and aging. It provides comprehensive reviews of research on biological and social influences on behaviour and age-related changes in psychological function.

Handbook of the Psychology of Aging Klaus Warner Schaie, Sherry L. Willis, 2011 The Handbook of the Biology of Aging 7e is 100% revised from the 6th edition. Providing a comprehensive synthesis and review of the latest research findings in the biology of aging, it is intended as a summary for researchers and is also suitable as a high-level textbook for graduate and upper-level undergraduate courses. The 7th edition is organized into two main sections: first covering the basic aging processes and then the medical physiology of aging. This puts less emphasis on research germane only to specific species and more emphasis on the mechanisms that affect aging across species and what this means medically for the aging of humans. This volume allows basic researchers to keep abreast of basic research outside their subdiscipline as well as recent clinical findings while allowing medical, behavioral, and social gerontologists to understand what basic scientists and clinicians are discovering.

Assessments, Treatments and Modeling in Aging and Neurological Disease Colin R. Martin, Victor R. Preedy, Rajkumar Rajendram, 2021-06-01 Assessments, Treatments and Modeling in Aging and Neurological Disease. The Neuroscience of Aging is a comprehensive reference on the diagnosis and management of neurological aging and associated disorders. The book discusses the mechanisms underlying neurological aging and provides readers with a detailed introduction to the aging of neural connections and complexities in biological circuitries as well as the interactions between genetics, epigenetics, and other micro-environmental processes. It also examines pharmacological and non-pharmacological interventions of age-related conditions that affect the brain, including Alzheimer's, stroke, and multiple sclerosis. Provides the most comprehensive coverage of the broad range of topics related to the neuroscience of aging. Features sections on diagnosis and biomarkers of neurological aging, Alzheimer's, and stroke. Contains an abstract key facts, a mini-dictionary of terms, and summary points in each chapter. Focuses on neurological diseases and conditions linked to aging, environmental factors, and clinical recommendations. Includes more than 500 illustrations and tables.

Current Catalog National Library of Medicine (U.S.), 1993 First multi year cumulation covers six years 1965 70 *Handbook of the Biology of Aging* Edward J. Masoro, Steven N. Austad, 2011-04-28 The Handbook of the Biology of Aging Sixth Edition provides a comprehensive overview of the latest research findings in the biology of aging Intended as a summary for researchers it is also adopted as a high level textbook for graduate and upper level undergraduate courses The Sixth Edition is 20% larger than the Fifth Edition with 21 chapters summarizing the latest findings in research on the biology of aging The content of the work is virtually 100% new Though a selected few topics are similar to the Fifth Edition these chapters are authored by new contributors with new information The majority of the

chapters are completely new in both content and authorship The Sixth Edition places greater emphasis and coverage on competing and complementary theories of aging broadening the discussion of conceptual issues Greater coverage of techniques used to study biological issues of aging include computer modeling gene profiling and demographic analyses Coverage of research on *Drosophila* is expanded from one chapter to four New chapters on mammalian models discuss aging in relation to skeletal muscles body fat and carbohydrate metabolism growth hormone and the human female reproductive system Additional new chapters summarize exciting research on stem cells and cancer dietary restriction and whether age related diseases are an integral part of aging The Handbook of the Biology of Aging Sixth Edition is part of the Handbooks on Aging series including Handbook of the Psychology of Aging and Handbook of Aging and the Social Sciences also in their 6th editions

Social Structures, Aging, and Self-Regulation in the Elderly K. Warner Schaie, PhD, Laura L. Carstensen, PhD, 2006-07-06 This collection considers ways in which societal contexts influence aging by influencing self regulatory processes No one doubts that the social contexts in which individuals develop exert strong influence on life trajectories Those born into environments that provide high quality education supportive social relations and economic assets do better in old age than those born into environments bereft of such resources The extent of this influence however is only beginning to be revealed Recent research shows that life experiences influence basic brain structures e g the effect of musical training on neural organization and functions e g inflammatory processes and that social embeddedness may even protect against Alzheimer's disease Similarly education increasingly appears to have a real effect on neural integrity Thus societal contexts may not simply open or close doors for individuals but may influence self regulatory processes at the most basic levels of functioning Although social structures are generally seen as the independent variables that affect individual aging it is also possible to think of a lifetime development of self regulatory processes leading to behaviors in old age that can have impact on and modify societal structures Two parts of this book consider self regulation as the dependent variable asking how social contexts influence cognitive emotional and self regulatory processes The third part reverses the question treating self regulation as the independent variable and retirement and physical health as dependent variables In this part consideration is given to how the effectiveness of self regulation influences physical and economic outcomes in old age

National Library of Medicine Current Catalog National Library of Medicine (U.S.), 1990

Working Memory and Ageing Robert H. Logie, Robin G. Morris, 2014-06-20 The rapid growth in the numbers of older people worldwide has led to an equally rapid growth in research on the changes across age in cognitive function including the processes of moment to moment cognition known as working memory This book brings together international research leaders who address major questions about how age affects working memory Why is working memory function much better preserved in some people than others In all healthy adults which aspects of working memory are retained in later years and which aspects start declining in early adulthood Can cognitive training help slow cognitive decline with age How are changes in brain structures connectivity and

activation patterns related to important changes in working memory function Impairments of cognition and particularly of working memory can be major barriers to independent living The chapters of this book dispel some popular myths about cognitive ageing while presenting the state of the science on how and why working memory functions as it does throughout the adult lifespan Working Memory and Aging is the first volume to provide an overview of the burgeoning literature on changes in working memory function across healthy and pathological ageing and it will be of great interest to advanced undergraduates postgraduates and researchers in psychology and related subject areas concerned with the effects of human ageing including several areas of medicine

Nursing for Wellness in Older Adults Carol A. Miller, 2009 Now in its Fifth Edition this text provides a comprehensive and wellness oriented approach to the theory and practice of gerontologic nursing Organized around the author's unique functional consequences theory of gerontologic nursing the book explores normal age related changes and risk factors that often interfere with optimal health and functioning to effectively identify and teach health promotion interventions The author provides research based background information and a variety of practical assessment and intervention strategies for use in every clinical setting Highlights of this edition include expanded coverage of evidence based practice more first person stories new chapters and clinical tools such as assessment tools recommended by the Hartford Institute of Geriatric Nursing

Handbook of Aging and the Social Sciences Robert H. Binstock, Linda K. George, Stephen J. Cutler, Jon Hendricks, James H. Schulz, 2011-05-05 The Handbook of Aging and the Social Sciences Sixth Edition provides a comprehensive summary and evaluation of recent research on the social aspects of aging The 25 chapters are divided into four sections discussing Aging and Time Aging and Social Structure Social Factors and Social Institutions and Aging and Society Within this context aging is examined from the perspectives of many disciplines and professions including anthropology bioethics demography economics epidemiology law political science psychology and sociology The Sixth Edition of the Handbook is virtually 100% new material Seventeen chapters are on subjects not carried in the previous edition Seven topics were carried over from the previous edition but written by new authors with fresh perspectives and brought up to date Some of the exciting new topics include social relationships in late life technological change and aging religion and aging lifestyle and aging perceived quality of life economic security in retirement and aging and the law There is also a greater emphasis on international perspectives particularly in chapters on aging and politics diversity and aging and immigration The Handbook will be of use to researchers and professional practitioners working with the aged It is also suitable for use as a course text for graduate and advanced undergraduate courses on aging and the social sciences

Ageing and Older Adult Mental Health Patrick Ryan, Barry J. Coughlan, 2013-03 This book examines the issues and implications that mental health professionals face when dealing with ageing and older adults The book focuses on the biological psychological and cultural influences that impact on the work of mental health practitioners who work with this client group Based on current empirical research and evidence based practical issues this book explores topics including

ageing and dementia elder abuse caring for older adults depression and ageing the paradox of ageing how older adults are key to the success of future generations Throughout the book the contributors emphasise the notion of healthy ageing and the importance and significance of this concept as part of the life cycle process As such Ageing and Older Adult Mental Health will be key reading not only for mental health professionals but also for those involved in policy making for older adults
