Agricultural Land Use and Natural Gas Extraction Conflicts Madeline Taylor, Tina Hunter, 2018-11-02 Onshore unconventional gas operations in most jurisdictions operate on the legal principle that all activities during exploration and extraction are temporary in nature The concept that the onshore unconventional gas industry has a temporary effect on the land on which it operates creates a regulatory paradox On one hand unconventional gas activities create energy security national wealth and a burgeoning export industry On the other agricultural land and agriculturalists may be significantly disadvantaged by unconventional gas activities potentially producing permanent damage to non renewable fertile soils and spoiling the underground water tables Thus threatening future food security and food sovereignty This book explores the socio regulatory dimensions of coexistence between agricultural and onshore unconventional gas land uses in the jurisdictions with the highest concentration of proven unconventional gas reserves Australia Canada the USA the UK France Poland and China In exploring the differing regulatory standpoints of unconventional gas land uses on productive farming land in the chosen jurisdictions this book provides an

original three part categorisation of regulatory approaches addressing the coexistence of agricultural land and unconventional gas namely adaptive management precautionary and finally statism It offers a timely and topical approach to socio legal natural resource governance theory based on the participation transparency and empowerment for agricultural landholders examining how differing frameworks such as the collective bargaining framework can create equitable and sustainable contractual arrangements with unconventional gas companies

Chinese-Japanese Competition and the East Asian Security Complex Jeffrey Reeves, Jeffrey Hornung, Kerry Lynn Nankivell, 2017-07-14 This volume examines contemporary diplomatic economic and security competition between China and Japan in the Asia Pacific region The book outlines the role that Sino Japanese competition plays in East Asian security an area of study largely overlooked in contemporary writing on Asian security which tends to focus on US China relations and or US hegemony in Asia The volume focuses on Chinese and Japanese foreign policy under President Xi Jinping and Prime Minister Shinz Abe and regional security dynamics within and between Asian states institutions since 2012 It employs regional security complex theory as a theoretical framework to view Chinese and Japanese competition in the Asian region In doing so the volume draws on a levels of analysis approach to demonstrate the value in looking at security in the Asia Pacific from a regional rather than global perspective The vast majority of existing research on the region s security tends to focus on great power relations and treats Asia as a sub region within the larger global security architecture In contrast this volume shows how competition between the two largest Asian economies shapes East Asia s security environment and drives security priorities across Asia s sub

regions As such this collection provides an important contribution to discussion on security in Asia one with potential to influence both political and military policy makers security practitioners and scholars This book will be of much interest to students of Asian politics regional security diplomacy and international relations
