Church and Religion in Contemporary Europe Gert Pickel, Olaf Müller, 2009-09-15 **Handbook of the Sociology of Morality** Steven Hitlin, Stephen Vaisey, 2010-10-17 Human beings necessarily understand their social worlds in moral terms orienting their lives relationships and activities around socially produced notions of right and wrong Morality is sociologically understood as more than simply helping or harming others it encompasses any way that individuals form understandings of what behaviors are better than others what goals are most laudable and what proper people believe feel and do Morality involves the explicit and implicit sets of rules and shared understandings that keep human social groups intact Morality includes both the shoulds and should nots of human activity its proactive and inhibitive elements At one time sociologists were centrally concerned with morality issues like social cohesion values the goals and norms that structure society and the ways individuals get socialized to reproduce those concerns In the last half century however explicit interest in these topics has waned and modern sociology has become uninterested in these matters and morality has become marginalized within the discipline But a resurgence in the topic is happening in related disciplines psychology neurology philosophy and anthropology and in the wider national discourse Sociology has much to offer but is not fully engaged in this conversation Many scholars work on areas that would fall under the umbrella of a sociology of morality but do not self

identify in such a manner nor orient their efforts toward conceptualizing what we know and should know along these dimensions The Handbook of the Sociology of Morality fills a niche within sociology making explicit the shared concerns of scholars across the disciplines as they relate to an often overlooked dimension of human social life It is unique in social science as it would be the first systematic compilation of the wider social structural cultural cross national organizational and interactional dimension of human moral understood broadly thought feeling and behavior *Annual Review of the Sociology of Religion. Volume 11 (2020)* Nanlai Cao, Giuseppe Giordan, Fenggang Yang, 2020-12-15 As China is being increasingly integrated into the global economy more and more Chinese people live transnational lives and practice religion globally So far scholarship of the relationship between religion and globalization in the Chinese religious field has primarily been set in the historical context of the encounter between Western Christian missionaries and local Chinese agents and little is known about a global Chinese religious field that is in the making The Annual Review of the Sociology of Religion volume 11 Chinese Religions Going Global seeks to challenge the dichotomous ordering of the western global and the Chinese local and to add a new perspective for understanding religious modernity globally Contributors from four continents who represent a range of specialisms apply social scientific methods in order to systematically research the globalization of Chinese religions *The Routledge Handbook of Religion, Gender and Society* Caroline Starkey, Emma Tomalin, 2021-12-30 In an era which many now recognise as post secular the role that religions play in shaping gender identities and relationships has been awarded a renewed status in the study of societies and social change In both the Global South and the Global North in the 21st century religiosity is of continuing significance not only in people s private lives and in the family but also in the public sphere and with respect to political and legal systems The Routledge Handbook of Religion Gender and Society is an outstanding reference source to these key topics problems and debates in this exciting subject area Comprising over 40 chapters by a team of international contributors the Handbook is divided into 3 parts Critical debates for religions gender and society theories concepts and methodologies Issues and themes in religions gender and society Contexts and locations Within these sections central issues debates and problems are examined including activism gender analysis intersectionality and feminism oppression and liberation equality bodies and embodiment space and place leadership and authority diaspora and migration marriage and the family generation and aging health and reproduction education violence and conflict ecology and climate change and the role of social media The Routledge Handbook of Religion Gender and Society is essential reading for students and researchers in religious studies and gender studies The Handbook will also be very useful for those in related fields such as cultural studies area studies politics sociology anthropology and history **Religion and Development in the Asia-Pacific** Matthew Clarke, Anna Halafoff, 2016-08-25 Community development is most effective and efficient when it is situated and led at the local level and considers the social behaviours needs and worldviews of local communities With more than eight out of ten people globally self reporting religious belief Religion and Development in the Asia Pacific Sacred places

as development spaces argues that the role and impact of religions on community development needs to be better understood. It also calls for greater attention to be given to the role of sacred places as sites for development activities and for a deeper appreciation of the way in which sacred stories and teachings inspire people to work for the benefit of others in particular locations. The book considers theories of place as a component of successful development interventions and expands this analysis to consider the specific role that sacred places, buildings and social networks have in planning, implementing and promoting sustainable development. A series of case studies examine various sacred places as sites for development activities. These case studies include Christian churches and disaster relief in Vanuatu; Muslim shrines and welfare provision in Pakistan; a women's Buddhist monastery in Thailand; advancing gender equity; a Jewish aid organisation providing language training to Muslim Women in Australia; and Hawaiian sacred sites located within a holistic retreat centre committed to ecological sustainability. *Religion and Development in the Asia Pacific* demonstrates the important role that sacred spaces can play in development interventions covering diverse major world religions, interfaith and spiritual contexts, and as such will be of considerable interest for postgraduate students and researchers in development studies, religious studies, sociology of religion and geography.

The Mainline in Late Modernity Maren Freudenberg, 2017-12-21. In the last fifty years, religion in America has changed dramatically, and Mainline Protestantism is following suit. This book reveals a fundamental transformation taking place in the Evangelical Lutheran Church in America. The ELCA is looking to postdenominational Christianity for inspiration on how to attract people to the pews but is at the same time intent on preserving its confessional liturgical tradition as much as possible in late modernity. As American religion grows increasingly experiential and individualistic, the ELCA is caught between its church heritage and a highly innovative culture that demands participative structures and a personal relationship with the divine. In the midst of this tension, the ELCA is deflating its church hierarchy and encouraging people to become involved in congregations on their own terms while it continues to celebrate its confessional liturgical identity. But can this balance between individual and institution be upheld in the long run? Or will the democratization and pluralization of the faith ultimately undermine the church? This book explores how the ELCA attempts to resist the forces of Americanization in late modernity even as it slowly but surely comes to resemble mainstream American religion more and more.

Roberts and David Yamane use an active learning approach to illustrate the central theories and methods of research in the sociology of religion and show students how to apply these analytical tools to new groups they encounter.

The New Jewish Diaspora Zvi Y. Gitelman, 2016-07-27. In 1900, over five million Jews lived in the Russian empire; today, there are four times as many Russian-speaking Jews residing outside the former Soviet Union than there are in that region. *The New Jewish Diaspora* is the first English language study of the Russian

speaking Jewish diaspora This migration has made deep marks on the social cultural and political terrain of many countries in particular the United States Israel and Germany The contributors examine the varied ways these immigrants have adapted to new environments while identifying the common cultural bonds that continue to unite them Assembling an international array of experts on the Soviet and post Soviet Jewish diaspora the book makes room for a wide range of scholarly approaches allowing readers to appreciate the significance of this migration from many different angles Some chapters offer data driven analyses that seek to quantify the impact Russian speaking Jewish populations are making in their adoptive countries and their adaptations there Others take a more ethnographic approach using interviews and observations to determine how these immigrants integrate their old traditions and affiliations into their new identities Further chapters examine how despite the oceans separating them members of this diaspora form imagined communities within cyberspace and through literature enabling them to keep their shared culture alive Above all the scholars in The New Jewish Diaspora place the migration of Russian speaking Jews in its historical and social contexts showing where it fits within the larger historic saga of the Jewish diaspora exploring its dynamic engagement with the contemporary world and pointing to future paths these immigrants and their descendants might follow

The Centrality of Religion in Social Life Eileen Barker, 2021-11-18 James A Beckford's work is internationally acclaimed not only in the sociology of religion but also in other fields of the social sciences Beckford has long been arguing that the barriers that have grown up between the different sub disciplines should be broken down with those specialising in religion becoming more cognisant of new theoretical developments and sociologists in general becoming more aware of the significance of developments in the religious scene This book is a collection of essays written in Beckford's honour drawing on a number of religious themes that have been central to Beckford's interests whilst also offering a significant contribution to our understanding of the wider society A central theme is modernity and its relation to the post modern and how religion affects and is affected by the dynamics of contemporary society with the primary focus of many of the chapters being a concern with how society copes with the minority religions that have become visible with the globalising tendencies of contemporary society The contributors who come from America Asia and various parts of Europe are all internationally renowned scholars Beckford's most important publications are listed in an Appendix and the volume opens with a short account of his contribution to sociology by Eileen Barker the editor and James T Richardson

Religion, Crime and Punishment Russil Durrant, Zoe Poppelwell, 2017-10-17 This book provides a critical discussion of the way in which religion influences criminal and antisocial behaviour punishment and the law intergroup conflict and peace making and the rehabilitation of offenders The authors argue that in order to understand how religion is related to each of these domains it is essential to recognise the evolutionary origins of religion as well as how genetic and cultural evolutionary processes have shaped its essential characteristics Durrant and Poppelwell posit that the capacity of religion to bind individuals into socially cohesive moral communities can help us to understand its complex relationship with cooperation

crime punishment inter group conflict and forgiveness An original and innovative study this book will be of special interest to criminologists and other social scientists interested in the role of religion in crime punishment intergroup conflict and law
