Poverty Gabriela Inchauste, João Pedro Azevedo, B. Essama-Nssah, Sergio Olivieri, Trang Van Nguyen, Jaime Saavedra-Chanduvi, Hernan Winkler, 2014-08-21 The 2015 Millennium Development Goal to cut in half the share of the world's population living in extreme poverty was met with time to spare By 2013 the percentage of developing country populations living in extreme poverty decreased from 43 percent in 1990 to 21 percent by 2010 Clearly there is still a long way to go with 1.2 billion people without enough to eat What can we learn from the recent success This volume presents recent methods to decompose the contributions to poverty reduction What was the main contributor to poverty reduction Using a simple accounting approach we find that labor income growth was the largest contributor to moderate poverty reduction for a group of 21 countries with substantial reductions in poverty over the past decade Moreover in most cases it was the growth in income per worker that contributed the most to poverty reduction rather than an increase in employment Changes in demographics public transfers and remittances helped but made relatively smaller contributions to poverty reduction Public transfers were important in reducing extreme poverty pointing to the crucial role of social protection systems How was labor income growth able to reduce poverty After a review of the literature a structural decomposition method is presented and implemented in three countries The results show that that labor income grew mainly because of higher returns to human capital endowments This could signal increases in productivity a higher relative price of labor or both In Bangladesh and Peru this was driven by higher returns to workers with low levels of education which may have partly been driven by higher food prices In contrast in Thailand poverty fell partly due to increasing returns to education **Income Inequality Around**

Global Finance and Development David Hudson, 2014-11-27 The question of money, how to provide it, and how to acquire it where needed, is axiomatic to development The realities of global poverty and the inequalities between the haves and the have-nots are clear and well documented, and the gaps between the world's richest and the world's poorest are ever increasing But even though funding development is assumed to be key, the relationship between finance and development is contested and complex This book explores the variety of relationships between finance and development, offering a broad and critical understanding of these connections and perspectives It breaks finance down into its various aspects, with separate chapters on aid, debt, equity, microfinance, and remittances Throughout the text, finance is presented as a double-edged sword while it is a vital tool towards poverty reduction, helping to fund development, more critical approaches remind us of the ways in which finance can hinder development It contains a range of case studies throughout to illustrate finance in practice, including UK aid to India, debt in Zambia, Apple's investment in China, microfinance in Mexico, government bond issues in Chile, and financial crisis in East Asia The text develops and explores a number of themes throughout, such as the relationship between public and private sources of finance, and debates about direct funding versus the allocation of credit through commercial financial markets The book also explores finance and development interactions at various levels, from the global structure of finance through to local and everyday practices *Global Finance and Development* offers a critical understanding of the nature of finance and development This book encourages the reader to see financial processes as embedded within the broader structure of social relationships Finance is defined and demonstrated to be money and credit, but also, crucially, the social

relationships and institutions that enable the creation and distribution of credit and the consequences thereof This valuable text is essential reading for all those concerned with poverty inequality and development Community Development (second Edition) Ledwith, Margaret,2011-04-27 This updated and expanded second edition of a bestselling text develops critiques of the changing context and identifies challenges faced by community development *The Statesman's Yearbook 2023* Palgrave Macmillan,2023-01-04 Now in its 159th edition The Statesman s Yearbook continues to be the reference work of choice for accurate and reliable information on every country in the world Covering political economic social and cultural aspects the Yearbook is also available online for subscribing institutions **Reaching the Marginalized** ,2010-01-01 Children at risk of marginalization in education are found in all societies At first glance The lives of these children may appear poles apart The daily experiences of slum dwellers in Kenya ethnic minority children in Viet Nam and a Roma child in Hungary are very different What they have in common are missed opportunities to develop their potential realize their hopes and build a better future through education A decade has passed since world leaders adopted the Education for All goals While progress has been made millions of children are still missing out on their right to education Reaching the marginalized identifies some of the root causes of disadvantage both within education and beyond and provides examples of targeted policies and practices that successfully combat exclusion Set against the backdrop of the global economic crisis The Report calls for a renewed financing commitment by aid donors and recipient governments alike to meet the Education for All goals by 2015 This is the eighth edition of the annual EFA Global Monitoring Report The Report includes statistical indicators on all levels of education in more than 200 countries and territories High-Growth Firms Arti Grover Goswami,Denis Medvedev,Ellen Olafsen,2019-01-23 Remarkably a small fraction of firms account for most of the job and output creation in high income and developing countries alike Does this imply that the path to enabling more economic dynamism lies in selectively targeting high potential firms Or would pursuing broad based reforms that minimize distortions be more effective Inspired by these questions this book presents new evidence on the incidence characteristics and drivers of high growth firms based on in depth studies of firm dynamics in Brazil C te d Ivoire Ethiopia Hungary India Indonesia Mexico South Africa Thailand Tunisia and Turkey Its findings reveal that high growth firms are not only powerful engines of job and output growth but also create positive spillovers for other businesses along the value chain At the same time the book debunks several myths about policies to support firm dynamism that focus on outward characteristics such as firm size sector location or past performance Its findings show that most firms struggle to sustain rapid rates of expansion and that the relationship between high growth and productivity is often weak Consequently the book calls for a shift toward policies that improve the quality of firm growth by supporting innovation managerial skills and firms ability to leverage global linkages and agglomeration To help policy makers structure policies that support firm growth the book proposes a new ABC framework of growth entrepreneurship improving Allocative efficiency encouraging Business to business spillovers and strengthening firm

Capabilities This book is the third volume of the World Bank Productivity Project which seeks to bring frontier thinking on the measurement and determinants of productivity to global policy makers Policy makers often get carried away by the disproportionate contributions of high growth firms to job and output growth and commit to pursuing policies targeting the potential stars This book separates fact from fiction underpinning such interventions through a comprehensive analysis of high growth firms across a range of developing countries making a compelling argument that public policy to pick prospective winners is neither possible nor desirable Policy makers would be wise to consult its arguments and policy advice when designing the next generation of policies to support the growth of firms William R Kerr Professor of Business Administration Harvard University author of *The Gift of Global Talent How Migration Shapes Business Economy and Society* How to ignite and sustain high firm growth has eluded both economic analysis and thought leaders in policy and business Through its meticulous and thoughtful analysis this important new book provides a tractable framework to guide policy to harness the growth and productivity potential of firms in the developing country context David Audretsch Distinguished Professor and Director of the Institute for Development Strategies Indiana University *Health Equity and Financial Protection*, 2011-01-01 Two key policy goals in the health sector are equity and financial protection New methods data and powerful computers have led to a surge of interest in quantitative analysis that permits monitoring progress toward these objectives and comparisons across countries ADePT is a new computer program that streamlines and automates such work ensuring that results are genuinely comparable and allowing them to be produced with a minimum of programming skills This book provides a step by step guide to the use of ADePT for quantitative analysis of equity and financial protection in the health sect **The Asian Economy** Kenta Goto, Tamaki Endo, Asei Ito, 2020-07-30 The book is a key reading which provides a comprehensive and systematic overview of the contemporary Asian economy The book focuses on the structural changes that are rapidly transforming the regional economic landscape in the 21st century It highlights the concomitant challenges that have arisen and further discusses prospects and potentialities of Asian economies given this new economic environment The book also looks at broader social issues that are both the cause and result of these new and complex economic dynamism in Asia Understanding the Asian economy cannot be achieved without understanding the new interrelationships and complexities that have evolved from this context which continue to be driven by drastic changes in technological demographic and social structures among others Each of the chapters are titled based on issues and are framed in present continuous tense intended to capture and emphasize the progressiveness of this new dynamism that are transforming the region in a fundamental way **Migration as Economic Imperialism** Immanuel Ness, 2023-05-25 For several decades wealthy states international development agencies and multinational corporations have encouraged labour migration from the Global South to the Global North As well as providing essential workers to support the transformation of advanced economies the remittances that migrants send home have been touted as the most promising means of national development

for poor and undeveloped countries As Immanuel Ness argues in this sharp corrective to conventional wisdom temporary labour migration represents the most recent form of economic imperialism and global domination A closer look at the economic and social evidence demonstrates that remittances deepen economic exploitation unravel societal stability and significantly expand economic inequality between poor and rich societies The book exposes the damaging political economic and social effects of migration on origin countries in Africa Asia and Latin America and how border and security mechanisms control and marginalize low wage migrant workers especially women and youth Ness asserts that remittances do not bring growth to poor countries but extend national dependence on the export of migrant workers leading to warped and unequal development on the global periphery This expert take will be a valuable resource for students and scholars of migration and development across the social sciences

New Directions in Social Impact Assessment Frank Vanclay, Ana Maria Esteves, 2011-01-01 This book should be read by anyone commissioning impact assessments who wants to build their understanding of the more progressive and innovative end of the topic A job well done in the eyes of stakeholders and regulators requires proper social analysis Jon Samuel Head of Social Performance Anglo American The list of authors reads like a who's who in SIA Academics and practitioners are equally represented among the authors The book provides a good mix of broad theoretical concepts and specific practical topics Martin Haefele Manager Environmental Impact Assessment at Mackenzie Valley Environmental Impact Review Board Yellowknife Northwest Territories Canada This book gives a very broad overview of where Social Impact Assessment is coming from where it is now and where it could go from an impact assessment tool to an impact management tool It provides a realistic insight in both the achievements and the struggles of Social Impact Assessment A recommended read for both those interested in Social Impact Assessment and those in related domains where social issues are gaining increasing importance such as Environmental Assessment and Sustainability Appraisal Rob Verheem Deputy Director Netherlands Commission for Environmental Assessment This important new book outlines current developments in thinking in the field of Social Impact Assessment SIA It advances the theory and practice of SIA and argues that a dramatic shift is required in the way socioeconomic studies and community participation is undertaken The book emphasizes that much more than the act of predicting impacts in a regulatory context SIA needs to be the process of managing the social aspects of development and that there needs to be a holistic and integrated approach to impact assessment It stresses that greater attention needs to be given to ensuring that the goals of development are attained and enhanced This significant addition to the literature will be an invaluable reference for academics consultants and practitioners
