Principles of Psychology Matt Jarvis, Paul Okami, 2020 Principles of Psychology Contemporary Perspectives offers students a complete introduction to psychology. It balances contemporary approaches with classic perspectives, weaves stimulating conceptual issues throughout the text, and encourages students to think critically, creatively, and practically about the subject and how it applies to the real world. It opens with an introduction to the study of psychology at undergraduate level and the positioning of psychology as a science, including coverage of some of its methods, before going on to look at the core domains of study typical in many European programmes and set out in the British Psychological Society guidelines. The carefully developed pedagogical scheme is focused on getting students to think critically about the subject and to engage with its methodological elements and on demonstrating real-world relevance. Digital formats and resources: Principles of Psychology Contemporary Perspectives is supported by online resources and is available for students and institutions to purchase in a variety of formats. The e-book is enhanced with embedded self-assessment activities and multi-media content, including animations, concept maps, and flashcards, to offer a fully immersive experience and extra learning support. www.oxfordtextbooks.co.uk/ebooks The study tools that enhance the e-book, along with web links to guide further reading, are also available as stand-alone resources for use alongside the print book. Here, lecturers can access a Lecturer's Guide to the book alongside downloadable PowerPoints, images, and Test Banks for use in their teaching. Pocket Guide Pain Management Claudia Spies, Benno Rehberg, Stephan A. Schug, Gunnar Jaehnicen, Sarah Harper, 2008-09-02 In the United States, about 50 million people suffer from recurrent or chronic pain, and nearly 10% of adults take medication for pain daily. Further, the

disease burden of pain is expected to grow relative to other illnesses and conditions. Despite the advances in pain medicine, most physicians are not equately trained to treat chronic or even acute pain. As in other fields of medicine, pain medicine has long been dominated by expert opinion relying on personal expertise and only recently has a systematic evaluation of treatments in the terms of evidence-based medicine been performed. And also as in other fields of medicine, a lot can be achieved in pain medicine when certain basic diagnostic and therapeutic pathways are followed correctly, more than can be achieved when only a few specialists are able to treat these conditions. Standard operating procedures (SOPs) are supposed to be concise practical aids for clinicians, standardizing treatments, diagnostic pathways and procedures in one of sometimes many possible ways. Although based on the available evidence, they are not evidence-based guidelines and are not supposed to replace such guidelines. On one hand, evidence-based medicine often leaves many options open since in many cases the available evidence is not sufficient to recommend a specific option. On the other hand, there might be reasons due to clinical practice, e.g.

Acute Pain Management Pamela E. Macintyre, Stephan A. Schug, 2021-06-20. Combines evidence-based information with practical guidelines and protocols. Covers the pharmacology of opioids, local anesthetics and nonopioid and adjuvant analgesic agents. Discusses management of acute pain in both surgical and nonsurgical acute pain settings, including in patients with spinal cord or burns injuries and selected medical illnesses. Includes evidence-based information about management of acute pain in some specific patient groups, including the older patient, opioid-tolerant patients and those with addiction disorders, pregnant or lactating patients and patients with obstructive sleep apnea or who have renal or hepatic impairment. Considers the role of acute pain management in the context of the current opioid epidemic and identifies possible strategies to minimise the risks. This resource will be helpful to a variety of professionals in assessing and managing acute pain.
