preordained that Porsche would eventually produce a turbocharged version of its air cooled flat six cylinder engine The resulting 930 Turbo appeared in the spring of 1975 in Europe Acceleration from 0 to 100 kilometers per hour took a scant 5.5 seconds and its top speed was 155 miles per hour The Turbo's distinctive rear wing let the world know that this was something very special It was nothing less than the rebirth of the high performance automobile At a time when the big block engines in America's so called muscle cars were putting out 180 horsepower and the engines in exotic supercars weren't much more ambitious the lightweight Porsche was a genuine rocket Porsche Turbo The Inside Story of Stuttgart's Turbocharged Road and Race Cars celebrates Porsche's five decades of turbocharged supercar performance both on the track and on the street It covers all of the major racing cars as well as the turbocharged street cars including the 930 935 924 944 968 911 and Cayenne Panamera Don't let this one fly past you
