Hansel and Gretel and the Space Witch Laurence Anholt, 2014-11-06 Hansel and Gretel's evil stepmother sends them into space and into the clutches of the even more evil Space Witch [Seriously Silly: Scary Fairy Tales: Hansel and Gretel and the Space Witch](#) Laurence Anholt, 2016-07-05 Hansel and Gretel's evil stepmother sends them into space and into the clutches of the even more evil Space Witch **A Space of Anxiety** Anne Fuchs, 1999 A Space of Anxiety engages with a body of German Jewish literature that from the beginning of the century onwards explores notions of identity and kinship in the context of migration exile and persecution The study offers an engaging analysis of how Freud Kafka Roth Drach and Hilsenrath employ to varying degrees the travel paradigm to question those borders and boundaries that define the space between the self and the other A Space of Anxiety argues that from Freud to Hilsenrath German Jewish literature emerges from an ambivalent space of enunciation which challenges the great narrative of an historical identity authenticated by an originary past Inspired by postcolonial and psychoanalytic theories the author shows that modern German Jewish writers inhabit a Third Space which poses an alternative to an understanding of culture as a homogeneous tradition based on national unity By endeavouring to explore this third space in examples of modern German Jewish literature the volume also aims to contribute to recent efforts to rewriting literary history In retracing the inherent ambivalence in how German Jewish literature situates itself in cultural discourse this study focuses on how this literature subverts received notions of identity and racial boundaries The study is of interest to students of German literature German Jewish literature and Cultural Studies

Rosebery, Jesse Solomon, Beth Warren, 2004-12-13 This book re-examines the dichotomy between the everyday and the disciplinary in mathematics and science education and explores alternatives to this opposition from points of view grounded in the close examination of complex classroom events It makes the case that students' everyday experience and knowledge in their entire manifold forms matter crucially in learning sciences and mathematics The contributions of 13 research teams are organized around three themes 1 the experiences of students in encounters with everyday matters of a discipline 2 the concerns of curriculum designers including teachers as they design activities intended to focus on everyday matters of a discipline and 3 the actions of teachers as they create classroom encounters with everyday matters of a discipline As a whole the volume reflects the shift in the field of educational research in recent years away from formal structural models of learning toward emphasizing its situated nature and the sociocultural bases of teaching and learning At least two trends increasing awareness that formal theories can be useful guides but are always partial and provisional in how they disclose classroom experiences and the widespread availability of video and audio equipment that enables effortless recording of classroom interactions have reoriented the field by allowing researchers and teachers to look at learning starting with complex classroom events rather than formal theories of learning Such examinations are not meant to replace the work on general theoretical frameworks but to ground them in actual complex events This reorientation means that researchers and teachers can now encounter the complexity of learning and teaching as lived human meaning-making experiences Immersion in this complexity compels rethinking assumptions about the dichotomies that have traditionally organized the field's thinking about learning Further it has important implications for how

the relationship between theory and practice in understanding teaching and learning is viewed Everyday Matters in Science and Mathematics Studies of Complex Classroom Events is an important resource for researchers teacher educators and graduate students in mathematics and science education and a strong supplemental text for courses in these areas and also in cognition and instruction and instructional design
