Hare Brain Tortoise Mind How Intelligence Increases When You Think Less:

Hare Brain, Tortoise Mind Guy Claxton, 2016-05-31 Backs up anecdotal studies of creativity with up to date Information about the latest research into brain function a fascinating book Anthony Storr author of Solitude A Return to Self In these accelerated times our decisive and businesslike ways of thinking are unprepared for ambiguity and paradox and we ve lost our appreciation for the value of sleeping on it We assume that the quick thinking hare brain will beat out the slower intuition of the tortoise mind But new research in cognitive science is changing this understanding of human mental processes It suggests that patience and confusion not rigor and certainty are the essential precursors of wisdom With a compelling argument that the mind works best when we trust our unconscious or undermind psychologist Guy Claxton makes an appeal that we be less analytical and let our creativity have free rein He also encourages reevaluation of society s obsession with results oriented thinking and problem solving under pressure Packed with interesting anecdotes a dozen puzzles to test your reasoning and the latest related research Hare Brain Tortoise Mind is an illuminating uplifting stimulating read that focuses on a new kind of well being and cognition The essential guide to creative thinking John Cleese His multidisciplinary approach is beautifully executed Kirkus Reviews Counterintuitive provocative While Claxton speaks the language of cognitive science his ideas resonate with Freud s description of the unconscious Buddhist concepts of the divine ground of existence and the great Romantic poets notions of the fount of creativity Publishers Weekly **Increasing**

Competence Through Collaborative Problem-Solving Gerda Hanks, 2016-02-04 First Published in 1999 This book is about the use of a specific collaborative problem solving approach as part of a Continuing Professional Development policy Collaborative staff development programmes now envisaged in a DoE 1998 Programme of Action can assist teachers in responding more appropriately as an integral part of their daily professional task to the learning needs of pupils with emotional and behavioural problems **Thought in Action** Barbara Gail Montero, 2016-04-28 How does thinking affect doing There is a widely held view both in academia and in the popular press that thinking about what you are doing as you are doing it hinders performance Once you have acquired the ability to putt a golf ball play an arpeggio on the piano or parallel park reflecting on your actions leads to inaccuracies blunders and sometimes even utter paralysis that s what is widely believed Experts according to this view don t need to try to do it they just do it But is this true After exploring some of the contemporary and historical manifestations of the idea that highly accomplished skills are automatic and effortless Barbara Gail Montero develops a theory of expertise which emphasizes the role of the conscious mind in expert action She aims to dispel various myths about experts who proceed without any understanding of what guides their action For example that proverbial chicken sexer who can t explain why he makes his judgments He simply doesn t exist Montero s critical task also involves analyzing research in both philosophy and psychology that is taken to show that conscious control and explicit monitoring of one s movements impedes well practiced skills She explores a wide range of real life examples of optimal

Jacket Developing Thinking and Understanding in Young Children Sue Robson,2006-09-27 Invaluable for anyone looking to understand young children s thinking this essential textbook helpfully combines introductions to theories about thinking with observations from real life practice The book explores underlying theories behind topics such as the relationship between nature and nurture models of cognitive development with ideas from key thinkers such as Piaget Vygotsky and Bruner basic neuroscience and its application to early childhood the social emotional and cultural context of children s development emotional intelligence language and thought including the use of motherese and children s talk in pretend play whether children can think philosophically The author accompanies every topic with observations from the classroom supported by her own critical analysis linking theory to practice throughout The Power of Small Linda Kaplan

Thaler,Robin Koval,2009-04-21 The authors of the national bestseller The Power of Nice once again tackle conventional wisdom with a provocative and counterintuitive book about the importance of sweating the small stuff in our lives and in our careers Our smallest actions and gestures often have outsized impact on our biggest goals Did you double check that presentation one last time or hold the elevator for a stranger Going that extra inch whether with a client customer family member or friend speaks volumes to others about our talent personality and motivations After all if we can t take care of the small details how can we be counted on to deliver when it really matters In today s challenging times bigger isn t always better In fact it s often the baby steps that put us on the path to delivering a true competitive advantage The real secret to getting ahead in life and in our careers is to refocus our attention on the small details that if disregarded can sabotage a multimillion dollar ad campaign or undermine your most important relationships Kaplan Thaler and Koval show how to get more of what you want with surprisingly less than you d imagine Written in the same entertaining story driven style that made The Power of Nice the go to book for finishing first The Power of Small demonstrates how all of us can harness the power of small to improve and reinvent our lives It s the ultimate guide to shrinking your outlook to broaden your horizons

Emerging Curriculum Andrew J.C. Begg,2008-01-01 An important contribution that Emerging curriculum makes is a

reconceptualizing of the curriculum development process This moves development thinking from the traditional research development dissemination model to one that acknowledges the interrelatedness of many influences on curriculum the multi layered nature of curriculum and the complexity of the educational system in which curriculum exists Indeed the educational system is envisaged as a complex living system The study is autobiographical it is based on a lifetime spent in education during which the author had a particular interest in curriculum and the associated development processes and how one s ideas about these change over time Emerging curriculum has been successfully submitted as a PhD thesis but was written as a book for a wider audience than the traditional thesis one It shows by example how reflection on one s work throughout one s career can be considered as research and can contribute to knowledge in a similar way to that of more traditional doctoral research projects It is hoped that teachers reading this will relate to the author s experiences in schools and will see themselves significant contributors to curriculum that curriculum developers will be provoked into considering alternative ways of working and that academics might move curriculum theorising closer to the reality of schools
