As a result, network operation costs, application response times and energy consumption are reduced, network reliability and performance are improved, network security and flexibility are enhanced. This will be a benefit for existing networks as well as evolved LTE based mobile networks emerging Internet of Things (IoT) Cloud systems and soon for the future 5G 6G networks. The future networks will reach a whole new level of self awareness, self configuration, self optimization, self recovery and self protection. This volume consists of 28 chapters based on recent research on IBN. The volume is a collection of the most important research for the future intent based networking deployment provided by different groups of researchers from Ukraine, Germany, Slovak Republic, Switzerland, South Korea, China, Czech Republic, Poland, Brazil, Belarus and Israel. The authors of the chapters from this collection present in depth extended research results in their scientific fields.
