

one lead at each end. This tool is used to discharge the battery pack when the pack requires balancing of the cells. The usage is covered in the appropriate section of the shop manual.

TIMING GUIDE, P/N 65712

The timing guide (Figure 1-8) is a most necessary tool for every service shop. Using the guide shortens the steps and time required to check and/or adjust the breaker points. The use of the guide is covered toward the end of this section and in Section Three. The timing guide cannot be used on electric start models.

TORQUE VALUES

Torque values are given in the table on this page, are repeated in the text and are shown on the exploded views next to the torque wrench symbol. The values are most important and should be carefully followed.

All torque readings should be made with either dry or Loctited threads except the connecting rod cap screws. The reading for the connecting rod cap screws should be made with the screws oiled with SAE 30 motor oil.
