experiments: pt. 1. Students' manual. pt. 2. Instructor's manual Edward Bradford Titchener,1905 The general purpose with which this book has been written is sufficiently indicated by its title I have selected a number of the classical experiments of Experimental Psychology and have tried to present them in such a way that their performance shall have a real disciplinary value for the undergraduate student Within this general purpose my aim has been two fold I have sought to show in the first place that psychology is above the laboratory that we employ our instruments of precision not for their own sake but solely because they help us to a refined and more accurate introspection And secondly just as in my Outline of Psychology and Primer of Psychology I gave the results of experimentation a prominent place in the psychological system so here I have treated the selected experiments not as separate exercises but as points of departure for systematic discussion PsycINFO

Laboratory Epistemologies Jenny Boulboulle, 2024-10-11 In *Laboratory Epistemologies A Hands On Perspective* Jenny Boulboulle examines the significance of hands on experiences in contemporary life sciences laboratories Addressing the relationship between contemplation and manipulation in epistemology Boulboulle combines participant observations in molecular genetics labs and microbiological cleanrooms with a longue dure study of the history and philosophy of science She radically rereads Descartes s key epistemological text *Meditations on First Philosophy* reframing the philosopher as a hands on knowledge maker With this reading Boulboulle subverts the pervasive modern conception of the disembodied knower and puts the hands on experimenter at the heart of life sciences research In so doing she contributes a theoretical model for understanding how life processes on cellular and molecular levels are manually produced in today s techno scientific spaces By reassessing the Cartesian legacy and arguing that epistemology should be grounded in the standpoint of a hands on practitioner Boulboulle offers the philosophical and historical foundation to understand and study contemporary life sciences research as multisensory embodied practices
