Fertilization occurs in the upper third of the oviduct; a zygote is produced.

The embryo is a ball of cells called a morula when it reaches the uterus on the third day.

By the fifth day, the morula is transformed into a blastocyst which consists of an outer trophoblast and an inner cell mass.

Phenology: An Integrative Environmental Science Mark D. Schwartz, 2011-04-28 Phenology is the study of plant and animal life cycle events which are triggered by environmental changes especially temperature Wide ranges of phenomena are included from first openings of leaf and flower buds to insect hatchings and return of birds Each one gives a ready measure of the environment as viewed by the associated organism Thus phenological events are ideal indicators of the impact of local and global changes in weather and climate on the earth's biosphere Assessing our changing world is a complex task that requires close cooperation from experts in biology climatology ecology geography oceanography remote sensing and other areas This book is a synthesis of current phenological knowledge designed as a primer on the field for global change and general scientists students and interested members of the public With contributions from a diverse group of over fifty phenological experts covering data collection current research methods and applications it demonstrates the accomplishments and potential of phenology as an integrative environmental science Atlas of Human Embryo Development Nicolas Plachta, Stephanie Bissiere, 2025-08-21 This important and exciting atlas shows with unprecedented resolution the development of the human embryo from fertilization to the end of pre implantation development Technology can now capture dynamic changes at the subcellular level that drive embryogenesis and development allowing the whole team in reproductive medicine to move on from traditional imaging of fixed specimens or classic light microscopy to seeing as if in 3D and real time the process of fertilization and development of the human embryo and of developmental defects The human embryo research documented here will be of paramount importance for reproductive health offering the chance to advance fertility treatments genetic disease prevention and our understanding of early human development Cumulated **Index Medicus** ,1994 **Official Register** Harvard University, 1916 Experimental Developmental Biology Laura R.
