

Installing Your Card

You can install an AGP card in slot 1 only. The AGP slot accepts standard AGP cards or AGP Pro cards. Install either PCI or PCI-X cards in the slots labeled PCI 2, 3, and 4. See the table on page 62.

- 1 Open your computer and remove the side panel and air deflector following the directions on page 42.

Warning: To avoid damaging its internal components or the components you want to install, always turn off and then unplug your Power Mac G5. Wait 5 or 10 minutes for it to cool down. Do not attempt to install items inside it while it is plugged in.

- 2 Remove the screw in the port access cover, pull out the access cover, and set it aside.

Note: To prevent screws from the PCI port access cover from dropping into the enclosure, you may want to use a magnetic screw driver, available at most electronic supply stores. Take care not to place the magnetic screw driver near your hard drives or media such as CDs or DVDs.

- 3 Remove the card that you want to install from its static-proof bag and hold it by its corners, taking care not to touch the gold connector or any of the components on the card.
