La edad de seda Ana María Díaz Marcos, 2006 Este libro analiza las ideas de moda en circulación en España desde el siglo XVIII hasta las primeras décadas del siglo XX. No se trata por tanto de un estudio de la moda sino de las visiones y reflexiones sobre ella presentes en los discursos y textos de ese período. Europa descubre el mundo Trevor Cairns, 1991-03-15 La división estructural en libros base y monografías referidas a hechos cruciales para la interpretación de la historia de los pueblos conflictos, desarrollo social, cultural y tecnológico, vida cotidiana, pensamiento, permite tanto la comprensión global de la historia de la humanidad como la profundización sobre determinados acontecimientos o aspectos generalmente ignorados en los manuales al uso. Los estudiantes encuentran así una forma atractiva y unas amplias posibilidades de su aplicación al estudio de las múltiples facetas del devenir histórico y de las diferencias culturales y sociales. Se combinan así los grandes acontecimientos históricos con aspectos referidos a la vida cotidiana, al pensamiento o a los avances tecnológicos. Se ofrece de este modo una pluralidad de recursos para la investigación individual o colectiva y para el desarrollo de actividades sobre temas que a su vez relacionan la historia del pasado para la comprensión del mundo actual. Todos los libros de esta colección contienen abundantes ilustraciones, esquemas, mapas y gráficos aclaratorios de los textos y han sido diseñados en un formato especialmente adecuado para la consulta y el trabajo de los alumnos y alumnas.

Textiles of Medieval Iberia Gale R. Owen-Crocker, María Barrigón, Nahum Ben-Yehuda, Joana Sequeira, 2022 An examination of the fabrics, garments and cloth of the Iberian Middle Ages bringing out, in particular, the international context. The Medieval Iberian Peninsula encompassing various territories which make up present day Spain and Portugal was an ethnic and religious melting pot comprising Christian, Jewish and Muslim communities each contributing to a vibrant textile economy. They were also defined and distinguished by the material culture of clothing and dress partly dictated by religious and cultural tradition, partly imposed by rulers anxious to avoid cross-ethnic relationships considered undesirable. Nevertheless, textiles especially magnificent Islamic silks crossed these barriers. The essays in this volume offer the first full analysis of Iberian textiles from the period drawing on both material remains and historical documents supported by evidence from contemporary artwork. Chapters cover surviving textiles, many of them magnificent silks, textile industries and trade, court dress and its use as a language of power and patronage, the vast market in utilitarian textiles for lower status clothing and furnishings, and Muslim and Jewish dress. It also considers Arabic and Jewish texts as sources of information on textiles and the Arabic garment names which crossed into Spanish. Particular emphasis is given to the different ethnicities of Iberia and their influences on the use and trade of garments, both precious and common place, and textiles.

**History of Technology Volume 30** Ian Inkster, Angel Calvo, 2016-03-31

This book focuses on the development of four key issues in the development of modern Spain: knowledge, manufacturing, energy and telecommunications and public works. If technology transfer from advanced nations to less developed systems always worked then the whole world would now be rich. That this is not the case is so obvious we might well expect that the history of the processes, successes and failures of technology transfer across nations would be a very well established field of enquiry. In fact the theme is still a developing one and the present Special Issue centres on the case of Spain as exemplary in many respects. The collected essays focus upon the four major themes of knowledge, manufacturing, energy and telecommunications and public works. Essays range in time from the 18th century to the present time from studies of espionage and early links between craftsmen and savants to the institutions of technology from training systems to private enterprise activity or patents to case studies of silk manufacture, shipbuilding, mining, paper making and pharmaceuticals.

Each essay offers a broad variety of material to bring to bear on a major problem of world development past, present and future
