Green Chemistry in Industry Mark Anthony Benvenuto,Heinz Plaumann,2018-09-24 The greening of industry processes i e making them more sustainable is a popular and often lucrative trend which has emerged over recent years The 3rd volume of Green Chemical Processing considers sustainable chemistry in the context of corporate interests The American Chemical Society's 12 Principles of Green Chemistry are woven throughout this text as well as the series to which this book belongs

Sustainable Green Chemical Processes and their Allied Applications Inamuddin,Abdullah Asiri,2020-05-30 Urbanization industrialization and unethical agricultural practices have considerably negative effects on the environment flora fauna and the health and safety of humanity Over the last decade green chemistry research has focused on discovering and utilizing safer more environmentally friendly processes to synthesize products like organic compounds inorganic compounds medicines proteins enzymes and food supplements These green processes exist in other interdisciplinary fields of science and technology like chemistry physics biology and biotechnology Still the majority of processes in these fields use and generate toxic raw materials resulting in techniques and byproducts which damage the environment Green chemistry principles alternatively consider preventing waste generation altogether the atom economy using less toxic raw materials and solvents and opting for reducing environmentally damaging byproducts through energy efficiency Green chemistry is therefore the most important field relating to the sustainable development of resources without harmfully impacting the environment This book provides in depth research on the use of green chemistry principles for a number of applications
