

Model 8096 shown with optional equipment

GENERAL DESCRIPTION

The Lab-Volt Radar Training System consists of seven subsystems (Models 8096-1 to 8096-8). Subsystems 8096-1 to 8096-3 provide students with hands-on training in the principles and operation of analog and digital radar, as well as radar tracking systems. Subsystem 8096-4 adds an active jamming pod trainer to the system to train students in the principles and scenarios of Electronic Warfare (EW). Subsystem 8096-5 is a sophisticated pulse-mode, radar cross-section (RCS) measurement training system with inverse synthetic-aperture radar (ISAR) imagery capability that is specifically designed for operation at close range. Subsystem 8096-6 provides students with training in the principles of electronically steered antennas. Finally, subsystem 8096-8 introduces students to the basic principles and operation of synthetic aperture radar (SAR).

The Radar Training System uses patented technology to detect and track passive targets at very short range in the presence of noise and clutter. The very low transmitter power allows for safe operation in a variety of training environments.
