Environmental Health Perspectives ,2003-07 **Official Gazette of the United States Patent and Trademark Office** ,2000 **Allenby's Gunners** Alan H. Smith,2017-11-30 Alan Smith s Allenby s Gunners tells the story of artillery in the highly successful World War I Sinai and Palestine campaigns Following Gallipoli and the reconstitution of the AIF a shortage of Australian gunners saw British Territorial artillery allotted to the Australian Light Horse and New Zealand Mounted Rifle brigades It was a relationship that would prove highly successful and Allenby s Gunners provides a detailed and colorful description of the artillery war cavalry and infantry operations from the first battles of Romani and Rafa through the tough actions of Gaza the Palestine desert Jordan Valley and Amman to the capture of Jerusalem The story concludes with the superb victory of Megiddo and the taking of Damascus until the theater armistice of 1918 Smith Covers the trials and triumphs of the gunners as they honed their art in one of the most difficult battlefield environments of the war The desert proved hostile and unrelenting testing the gunners their weapons and their animals in the harsh conditions The gunners

adversary the wily and skillful Ottoman artillerymen endured the same horrendous conditions and proved a tough and courageous foe The light horsemen and gunners also owed much to the intrepid airmen of the AFC and RFC whose tactical and offensive bombing and counter battery work from mid 1917 would prove instrumental in securing victory This is an aspect of the campaign that is seamlessly woven throughout as the action unfolds The Sinai and Palestine campaigns generally followed a pattern of heavy losses and setbacks for an initial period before allied forces eventually prevailed This is a highly descriptive volume that tells and oft neglected story and fills the gap in the record of a campaign in which Australians played a significant role It is a welcome addition to the story of the Australians in the Middle Eastern campaigns of World War I *Reference Catalogue of Current Literature* ,1913 **The Publishers' Circular and Booksellers' Record** ,1912

A Framework to Guide Selection of Chemical Alternatives National Research Council,Division on Earth and Life Studies,Board on Environmental Studies and Toxicology,Board on Chemical Sciences and Technology,Committee on the Design and Evaluation of Safer Chemical Substitutions: A Framework to Inform Government and Industry Decisions,2014-10-29 Historically regulations governing chemical use have often focused on widely used chemicals and acute human health effects of exposure to them as well as their potential to cause cancer and other adverse health effects As scientific knowledge has expanded there has been an increased awareness of the mechanisms through which chemicals may exert harmful effects on human health as well as their effects on other species and ecosystems Identification of high priority chemicals and other chemicals of concern has prompted a growing number of state and local governments as well as major companies to take steps beyond existing hazardous chemical federal legislation Interest in approaches and policies that ensure that any new substances substituted for chemicals of concern are assessed as carefully and thoroughly as possible has also burgeoned The overarching goal of these approaches is to avoid regrettable substitutions which occur when a toxic chemical is replaced by another chemical that later proved unsuitable because of persistence bioaccumulation toxicity or other concerns Chemical alternative assessments are tools designed to facilitate consideration of these factors to assist stakeholders in identifying chemicals that may have the greatest likelihood of harm to human and ecological health and to provide guidance on how the industry may develop and adopt safer alternatives A Framework to Guide Selection of Chemical Alternatives develops and demonstrates a decision framework for evaluating potentially safer substitute chemicals as primarily determined by human health and ecological risks This new framework is informed by previous efforts by regulatory agencies academic institutions and others to develop alternative assessment frameworks that could be operationalized In addition to hazard assessments the framework incorporates steps for life cycle thinking which considers possible impacts of a chemical at all stages including production use and disposal as well as steps for performance and economic assessments The report also highlights how modern information sources such as computational modeling can supplement traditional toxicology data in the assessment process This new framework allows the evaluation of the full range

of benefits and shortcomings of substitutes and examination of tradeoffs between these risks and factors such as product functionality product efficacy process safety and resource use Through case studies this report demonstrates how different users in contrasting decision contexts with diverse priorities can apply the framework This report will be an essential resource to the chemical industry environmentalists ecologists and state and local governments **Scientific and Technical Aerospace Reports** ,1978
