 Huler,2007-12-18 Nature rightly questioned never lies A Manual of Scientific Enquiry Third Edition 1859 Scott Huler was
 working as a copy editor for a small publisher when he stumbled across the Beaufort Wind Scale in his Merriam Webster
 Collegiate Dictionary It was one of those moments of discovery that writers live for Written centuries ago its 110 words
 launched Huler on a remarkable journey over land and sea into a fascinating world of explorers mariners scientists and
 writers After falling in love with what he decided was the best clearest and most vigorous piece of descriptive writing I had
 ever seen Huler went in search of Admiral Francis Beaufort himself hydrographer to the British Admiralty man of science and
 author Huler assumed of the Beaufort Wind Scale But what Huler discovered is that the scale that carries Beaufort s name
 has a long and complex evolution and to properly understand it he had to keep reaching farther back in history into the lives
 and works of figures from Daniel Defoe and Charles Darwin to Captains Bligh of the Bounty and Cook of the Endeavor As
 hydrographer to the British Admiralty it was Beaufort s job to track the information that ships relied on where to lay anchor
 descriptions of ports information about fortification religion and trade But what came to fascinate Huler most about Beaufort
 was his obsession for observing things and communicating to others what the world looked like Huler s research landed him
 in one of the most fascinating and rich periods of history because all around the world in the mid eighteenth and nineteenth
 centuries in a grand expansive period modern science was being invented every day These scientific advancements
 encompassed not only vast leaps in understanding but also how scientific innovation was expressed and even organized
 including such enduring developments as the scale Anders Celsius created to simplify how Gabriel Fahrenheit measured
 temperature the French designed metric system and the Gregorian calendar adopted by France and Great Britain To Huler
 Beaufort came to embody that passion for scientific observation and categorization indeed Beaufort became the great
 scientific networker of his time It was he for example who was tapped to lead the search for a naturalist in the 1830s to
 accompany the crew of the Beagle he recommended a young naturalist named Charles Darwin Defining the Wind is a
 wonderfully readable often humorous and always rich story that is ultimately about how we observe the forces of nature and
