This updated Third Edition has been expanded in every section with thoughtful practical advice and has case scenarios in a question and answer format of situations encountered with real world patients. It is the most comprehensive review of clinical subjective refraction to date. Drs Richard Kolker and Andrew Kolker together have nearly 50 years of experience in the practice of ophthalmology and bring both the fresh eyes of a beginning ophthalmologist and the experience of a seasoned veteran to this Third Edition. While new residents and technicians will appreciate the thorough explanation of refractive fundamentals, even expert ophthalmologists will appreciate the practical tips that may have never occurred to them. Included are Very clear, easy to read, practical explanations of the subjective refraction process. Basic practical optics to explain the steps of subjective refraction. The Jackson Cross Cylinder made easy to understand and use. Plus and minus cylinder methods discussed separately and color coded for quick identification.
