Manual Memento Degremont:

The British National Bibliography Arthur James Wells, 1973 **Pollution Control in Fertilizer Production** C.A. Hodge, 1994-05-20 This timesaving guide addresses nearly every aspect of pollution control for the mining production transportation and distribution of chemical fertilizers covering current and emerging technologies for all segments of the industry including raw materials production end products and by products **Dictionary Catalog of the Research Libraries of the New York Public Library, 1911-1971** New York Public Library. Research Libraries, 1979

Fisicoquímica y microbiología de los medios acuáticos Marín Galván, Rafael, 2019-01-01 El estudio del agua su control de calidad así como su tratamiento y depuración es sin duda una parcela pujante en la sociedad actual con notable cantidad de técnicos ocupados en la misma. Se antoja pues interesante contar con obras que conjunten aspectos de sesgo más académico tales como los relativos a fenómenos físicoquímicos y microbiológicos y microorganismos acuáticos tanto en aguas naturales como modificadas por el hombre con otros más técnicos relacionados con el tratamiento y depuración industrial de aguas y también con aquellos que fundamenten la aplicación de las normativas aplicables al sector y no necesariamente dirigidos a especialistas. Todo lo dicho intenta conjugarse en este libro que recoge en sus tres primeros capítulos una visión sistemática sobre la dinámica físicoquímica y microbiológica natural de las aguas desarrollando los mecanismos que determinan la presencia y la concentración final de especies químicas y microorganismos en los medios acuáticos con o sin la posibilidad de alteración de su estado original por causas naturales o antropogénicas. En el capítulo cuarto se recogen las bases de los procesos usuales de tratamiento y depuración industrial de aguas reseñando primero los principios físicoquímicos y microbiológicos de los procesos unitarios aplicados y después traslados a la práctica a escala industrial. El quinto capítulo realiza una exposición actualizada de las normativas sectoriales más relevantes españolas y europeas de obligado cumplimiento para aguas naturales de consumo humano residuales regeneradas y aguas de piscinas resaltando sus puntos más relevantes. El capítulo sexto presenta una aproximación a la problemática de los contaminantes emergentes verdadera fuente de preocupación en el mundo actual seguido de un capítulo sumo recopilando las técnicas aplicables en control físicoquímico microbiológico virológico y radiológico de aguas con especial atención a las consideradas como modelos de referencia. Finaliza esta obra con la reseña bibliográfica capítulo octavo nacional e internacional más reseñable sobre aguas incluyendo revistas imprescindibles para todos los interesados en este apasionante campo *Directions*, 1980 *Operation and Control of Water Treatment Processes* Charles Raymond Cox, World Health Organization, 1951 **Depurazione delle acque di piccole comunità. Tecniche naturali e tecniche impiantistiche** Luigi Masotti, Paola Verlicchi, 2005 *Catalogue* Canadian Federation of Mayors and Municipalities. Municipal Reference Library, 1956 **Report of the 3d-4th Congress of the Sanitary Institute of Great Britain** Royal Society of Health (Great Britain), 1966 **Subject Catalog** Library of Congress, 1976
