Hart, Mary W. Wood, Benjamin L. Hart, 2008-02-28 Why do students continue to dissect animals in biology classes Why despite the excellence of teaching resources for veterinary and human medical education that substitute for dissection do those provided for pre college students fall short in convenience flexibility and coordination with the curriculum Why Dissection Animal Use in Education looks beyond the typical yes or no debate about dissection to understand how we came to our current practice of dissection in intermediate and high school biology even as preparation of health professionals has moved away from dissection Despite the many forces that support the continued use of dissection in pedagogy teachers retain much autonomy in how they teach in the classroom and legislation in many states provide specific requirements for what should and should not be taught in separated science and health curricula offering students the option to not engage in dissection Why Dissection walks students teachers and parents through these options to help them make more informed choices regarding their science education options Handbook of Research on STEM Education Carla C. Johnson, Margaret J. Mohr-Schroeder, Tamara J. Moore, Lyn D. English, 2020-04-27 The Handbook of Research on STEM Education represents a groundbreaking and comprehensive synthesis of research and presentation of policy within the realm of science technology engineering and mathematics STEM education What distinguishes this Handbook from others is the nature of integration of the disciplines that is the founding premise for the work all chapters in this book speak directly to the integration of STEM rather than discussion of research within the individual content areas The Handbook of Research on STEM Education explores the most pressing areas of STEM within an international context Divided into six sections the authors cover topics including the nature of STEM STEM learning STEM pedagogy curriculum and assessment critical issues in STEM STEM teacher education and STEM policy and reform The Handbook utilizes the lens of equity and access by focusing on STEM literacy early childhood STEM learners with disabilities informal STEM socio scientific issues race related factors gender equity cultural relevancy and parental involvement Additionally discussion of STEM education policy in a variety of countries is included as well as a focus on engaging business industry and teachers in advocacy for STEM education The Handbook s 37 chapters provide a deep and meaningful landscape of the implementation of STEM over the past two decades As such the findings that are presented within provide the reader with clear directions for future research into effective practice and supports for integrated STEM which are grounded in the literature to date Canadiana ,1991 Teaching at Its Best Linda B. Learning something new particularly something that might change your mind is much more difficult than most teachers think Because people think with their emotions and are influenced by their communities and social groups humans tend to ignore new information unless it fits their existing worldview Thus facts alone even if discussed in detail typically fail to open minds and create change In a world in need of graduates who can adapt to new information and situations we need to renew our educational commitment to producing flexible and independent thinkers In Teaching Change Jos Antonio Bowen argues that education needs to be redesigned to take into account how human thinking behaviors bias and change really work Drawing on new research Bowen explores how we can create better conditions for learning that focus less on teachers and content and more on students and process He also examines student psychology history assumptions anxiety and bias and advocates for education to focus on a new 3Rs relationships resilience and reflection Finally he suggests explicit learning designs to foster the ability to think for yourself The case for a liberal by which Bowen means liberating education has never been stronger but he says it needs to be redesigned to achieve the goal of creating lifelong learners and citizens capable of divergent and independent thinking With an expansive and powerful argument Teaching Change combines elegant and gripping explanations of recent and wide ranging research from biology economics education and neuroscience with hundreds of practical suggestions for individual teachers
