Energy Tips Ralph W. Ritchie, Fern J. Ritchie, 2001-03-01 We are in a power crunch and you need help It is not going to go away Fuel costs population increases or the need to reduce air pollution will all keep us in a power hungry situation Either we cannot afford it can no longer breathe it or there will not be enough The purpose of this book is to ease the problem

Better start learning now Experience is the best teacher but you need help before you can acquire experience on your own
 Next best is to benefit from another's experience This book collects the relevant material from most of the authors over 50
 books They were written for people who want to help themselves Does that include you This book contains over 50 years of
 ways we have used to conserve energy We started early The message of energy shortages to come wasn't widely publicized
 although it's coming was announced and published in the 1950's We hope that rolling blackouts are the most with which we
 will have to cope In today's culture even that is a minor disaster Electricity is the hinge upon which our lives swing Most of
 us can't even tell time without electricity or when it comes back on how do we reset the clocks In fact every floating
 automatic device in the house will need resetting We depend upon electricity for all the niceties of living What about the
 necessities Food Preservation and Spoilage Heat Light both to see and for security Water No hot water without electricity City
 and Rural water is supplied by electric pumps Enjoy air conditioning A hot tub Hot water These are things we can live
 without if we must although there are energy efficient ways to have these things Otherwise either the cost of having them or
 the need to use a minimum of electricity may make them unavailable Solar Energy will heat your home and provide hot water
 It will even heat a hot tub We use what is in this book ALL the time Electrical Installation Record ,1915 **Home Power**
