Innovation Policy Nicholas S. Vonortas, Phoebe C. Rouge, Anwar Aridi, 2014-12-10 This book provides a concise introduction to important aspects of contemporary innovation policy with particular emphasis on its impact on economic growth and development. It addresses a non-specialist audience interested in quickly building background knowledge, getting familiar with the terminology and understanding core concerns and debates in this area of policy. The book has its origins in a more extensive report to the World Bank prepared to impart background information to middle and upper level policy decision makers and analysts as well as stakeholders from industry and universities from developing countries prior to engaging in intensive how to policy training. Our audience also includes upper level undergraduate and graduate students embarking on the study of innovation policy. Featuring contributions from leading scholars and policy experts, this volume references critical readings, presents a wide array of data on the following topics: Fundamentals of Innovation Policy for Growth and Development, University Entrepreneurship, Strategic Alliances, Knowledge Intensive Partnerships, Clusters, Science Parks, Knowledge Business Incubators, High Risk Finance, Intellectual Property Standards.

Innovation and the Entrepreneurial University Dirk Meissner, Erkan Erdil, Joanna Chataway, 2018-03-26 The book explores different approaches towards the entrepreneurial university paradigm, explores channels and mechanisms used by universities to implement the paradigm, and contributes to the public discussion on the impact of commercialization on university research and knowledge. It argues that different types of university-industry interaction may have repercussions even on funding of basic research if an appropriate balance is ensured between the two. University activities, both research and education in all forms, should provide economic and social relevance directed towards open science and open innovation. This book adds value to current knowledge by presenting both a conceptual framework and case studies which describe different contexts.
