trends in the region It also discusses in detail the key policy areas the most fundamental being urban governance and finance where actions must be taken to make cities more prosperous and livable **Leading the Inclusive City** Robin

Hambleton,2014-11-24 Cities are often seen as helpless victims in a global flow of events and many view growing inequality in cities as inevitable This engaging book rejects this gloomy prognosis and argues that imaginative place based leadership can enable citizens to shape the urban future in accordance with progressive values advancing social justice promoting care for the environment and bolstering community empowerment This international and comparative book written by an experienced author shows how inspirational civic leaders are making a major difference in cities across the world The analysis provides practical lessons for local leaders and a significant contribution to thinking on public service innovation for anyone who wants to change urban society for the better *Megacity Mobility Culture* BMW Group,2013-01-13 What

determines how cities move on The ever increasing challenges to urban mobility come in many forms and approaches to address them range from the technically ingenious to attempts to change travel behaviour Key amongst factors essential to the success of any such approach is whether the urban environment proves to be fertile ground for the desired progress Another vital determinant of success is how well individual measures to engineer the transport system interact with other developments This leads to the principal subject of *Megacity Mobility Culture* the basic principles that determine the paths along which cities move This book demonstrates that the concept of mobility culture provides a framework for understanding the development of urban transport which transcends the boundaries between academic disciplines Based on a discussion of the diversity of megacities worldwide it provides help in navigating the complexity of megacity mobility culture Experts from megacities around the world each take the reader on a journey to their own city and its mobility culture giving a deeper insight into the unique evolutionary paths of mobility that these places have taken and what lies before them Whilst acknowledging the overwhelming diversity of cities worldwide the authors also identify common denominators behind the evolution of urban transport systems seven temperaments which are found in a unique mix in any given city defining the character of its mobility culture The Institute for Mobility Research is a research facility of the BMW Group It deals with future developments and challenges relating to mobility across all modes of transport with automobility being only one aspect among many Taking on an international perspective ifmo s activities focus on social science and sociopolitical economic and ecological issues but also extend to cultural questions related to the key challenges facing the future of mobility The work of the Institute is supported by an interdisciplinary board of renowned scientists and scholars and by representatives of BMW Deutsche Bahn Lufthansa MAN Siemens and The World Bank **Reforming Urban Transport in**

India M Ramachandran,2017-07-07 Reforming Urban Transport in India is an attempt to take stock of the various issues our cities and towns are facing in the area of urban transport efforts made and being made both at the policy level as well as the field level to address the problems the ever increasing complexities of challenges in the area of urban mobility and some of

the laudable initiatives on the ground to handle the problems This book would be a valuable addition to the limited literature available on the subject of urban transport in India The topic has not attained much prominence even in the broader discussions on the transport sector issues in the country The fact that we address our urban transport issues in a casual manner but there is need to take them up in a focused and purposeful manner and this can no longer be delayed is probably the one loud message which is emerging out of this volume The wealth of knowledge of the contributors each one of them having huge experience behind them in this sector makes the book a valuable addition to the literature and a helpful guide in policy discussions

Urban Transport Development I.P. Gautam and H.M. Shivanand Swamy,2023-01-01 This book emerged from the need to have insights from the planning designing and operating a large urban transport project the Ahmedabad Janmarg a Bus Rapid Transit System The analysis is based on the concepts from the Actor Network Theory It describes the changing roles of various actors humans organisations and technology and how their actions are transformed into collaborations in shaping urban and transport systems in a large city It will be a useful read for academicians researchers administrators development professionals and policymakers involved in urban development

Newton,Elena Cantarello,2014-08-13

The green economy is widely seen as a potential solution to current global economic and environmental crises and a potential mechanism by which sustainable development might be achieved in practice Considerable investments are now being made into the development of green technology renewable energy biodiversity conservation resource efficiency recycling of materials and green infrastructure This textbook provides a comprehensive introduction to the green economy using a strongly interdisciplinary approach based on environmental science rather than treating it as a sub set of economics The scientific principles of sustainability are presented which provide the foundations of the green economy with a particular focus on systems based approaches Examples of real world case studies are used to illustrate how the green economy can be achieved in practice In this way the authors provide a thorough overview of both the principles and practice of the green economy drawing from a wide range of disciplines including ecology geography social science psychology sustainability science environmental science law and economics The emphasis is on presenting results of the latest research derived from leading scientific journals Rather than focusing on a single definition of what constitutes a green economy the book introduces readers to the diversity of opinion that exists and engages them in what is an active on going debate This reflects the fact that many aspects of the green economy and sustainable development more generally are currently contested In particular the book will help readers to strengthen their ability to critically evaluate the evidence for and against the views presented and to actively contribute to the future development of the green economy **Planning and Design for**

Sustainable Urban Mobility Un-Habitat,2013-10-30 Urban transport systems worldwide are faced by a multitude of challenges Among the most visible of these are the traffic gridlocks experienced on city roads and highways all over the world The prescribed solution to transport problems in most cities has thus been to build more infrastructures for cars with a limited number of cities improving public transport systems in a sustainable manner However a number of challenges faced by urban transport systems such as greenhouse gas emissions noise and air pollution and road traffic accidents do not necessarily get solved by the construction of new infrastructure Planning and Design for Sustainable Urban Mobility argues that the development of sustainable urban transport systems requires a conceptual leap The purpose of transportation and mobility is to gain access to destinations activities services and goods Thus access is the ultimate objective of transportation As a result urban planning and design should focus on how to bring people and places together by creating cities that focus on accessibility rather than simply increasing the length of urban transport infrastructure or increasing the movement of people or goods Urban form and the functionality of the city are therefore a major focus of this report which highlights the importance of integrated land use and transport planning This new report of the United Nations Human Settlements

Programme UN Habitat the world's leading authority on urban issues provides some thought provoking insights and policy recommendations on how to plan and design sustainable urban mobility systems The Global Report on Human Settlements is the most authoritative and up to date global assessment of human settlements conditions and trends Preceding issues of the report have addressed such topics as Cities in a Globalizing World The Challenge of Slums Financing Urban Shelter Enhancing Urban Safety and Security Planning Sustainable Cities and Cities and Climate Change *The Wiley-Blackwell Encyclopedia of Urban and Regional Studies* Anthony M. Orum, 2019-04-15 Provides comprehensive coverage of major topics in urban and regional studies Under the guidance of Editor in Chief Anthony Orum this definitive reference work covers central and emergent topics in the field through an examination of urban and regional conditions and variation across the world It also provides authoritative entries on the main conceptual tools used by anthropologists sociologists geographers and political scientists in the study of cities and regions Among such concepts are those of place and space geographical regions the nature of power and politics in cities urban culture and many others The Wiley Blackwell Encyclopedia of Urban and Regional Studies captures the character of complex urban and regional dynamics across the globe including timely entries on Latin America Africa India and China At the same time it contains illuminating entries on some of the current concepts that seek to grasp the essence of the global world today such as those of Friedmann and Sassen on global cities It also includes discussions of recent economic writings on cities and regions such as those of Richard Florida Comprised of over 450 entries on the most important topics and from a range of theoretical perspectives Features authoritative entries on topics ranging from gender and the city to biographical profiles of figures like Frank Lloyd Wright Takes a global perspective with entries providing coverage of Latin America and Africa India and China and the US and Europe Includes biographies of central figures in urban and regional studies such as Doreen Massey Peter Hall Neil Smith and Henri Lefebvre The Wiley Blackwell Encyclopedia of Urban and Regional Studies is an indispensable reference for students and researchers in urban and regional studies urban sociology urban geography and urban anthropology **Transit Oriented Development in West African Cities** Timothy Nubi, Taibat Lawanson, Basirat Oyalowo, 2024-08-12 The book addresses conceptual issues around urban transportation policy and practice in selected west African cities It highlights the institutional socio economic and infrastructural barriers of transit oriented development in West Africa Through a series of case studies the chapters present how transport governance systems affect housing land infrastructure development urbanization dynamics construction and the urban poor The chapters in this book are written by authors from multi disciplinary backgrounds including architecture construction management real estate urban planning and public health and are members of the African Research Network on Urbanization and Habitable Cities a research network supported by the UKRI African Research Universities Alliance Capacity Building Programme By providing a solid empirical portrait based on lived and research experience this book will be a great resource to students academics and policy makers in transport urban planning and
