Knowledge in the Development of Economies

Silvia Sacchetti, Roger Sugden, 2011-01-01 This book presents an entirely new approach to knowledge creativity and social organisation The first part of the book provides a trenchant critique of current globalisation of multinational corporations the WTO and intellectual property rights The rest of the book outlines an alternative globalisation based on inclusion democratic participation and equality The role of the universities in this process is given special attention The alternative globalisation is still based on the market economy but not necessarily one in which the sole objective of the corporations is to maximise profits The book is a must read for all economists including those who are satisfied with the current state of the subject The analyses of this volume of outstanding papers edited by Sacchetti and Sugden are fresh sober and entirely convincing Ajit Singh University of Cambridge UK It is arguable that at the root of the current global crisis lies the ferocious attack on critical thinking indeed freedom of thought that has taken place over the past 30 years or so The editors of this volume are among the minority voices that kept thinking outside the box and voicing their views during this period Their present volume offers fascinating readings on diverse issues ranging from uneven development through university and art management to motivation capabilities and democratic governance as they relate to knowledge and learning It is hoped that the book will receive the attention it deserves and that more such voices will now be raised and heard Christos Pitelis University of Cambridge UK While the relevance of knowledge in economic development represents a consolidated result this volume takes some important steps forward in new directions Highly valuable is the attempt to integrate the study of knowledge production with its potential for improved creativity whose expression is now dependent on the social structure and is not merely exogenous any more The focus on heterodox approaches and on non traditional organisational and proprietary forms is particularly coherent with both the theoretical premises of the volume and the expected evolution of economies Carlo Borzaga University of Trento Italy This is a collection of essays which escapes the confines of mainstream economics raising fundamental questions of the role of academics in policy making It requires the reader to imagine different worlds to think beyond present realities a book striving to deal with important issues not sliding over them to make cheap points A scholarly work demanding in places difficult but worth persevering with Should be read by everyone interested in a different way forward for economic development in a global world Keith Cowling University of Warwick UK This innovative book offers a critical perspective on the state of the current global economy making sense of knowledge related issues by critically assessing existing institutional choices as well as pointing to new ways forward The pioneering chapters reposition knowledge in a number of economic debates including regional development property rights social enterprises corporate governance the management of universities and the role of creative activities They explore the possibility of an institutional dynamism that impacts not only on the characteristics of localities and their place in a hierarchical and ordered system of

relationships but on the nature of the system itself. Conclusions point at the individual and collective dimensions of the knowledge discovery process suggesting a renewed approach to the assessment of economic choices. This insightful book offers an original perspective on knowledge related issues and constitutes a valuable read for academics and postgraduate students in international business and economic competitiveness as well practitioners and policymakers who are interested in alternative analyses and methods for economic development.

One Foot Out the Door Judith M. Bardwick, 2008 As many as two thirds of our employees are either actively looking for new jobs or merely going through the motions at their current jobs. Fearful and feeling vulnerable after years of watching friends get laid off they expect the worst to happen and they see no reason to give it their all. This phenomenon identified by renowned author Judith M Bardwick as the psychological recession can have a devastating effect on a company's financial health. Based on extensive research showing how costly bad management really is this eye opening book offers concrete prescriptions for combating alarming trends such as high turnover low productivity and lackluster performance including techniques for strengthening the bonds of trust and respect between managers and employees customizing working conditions and rewards for individual employees hiring for the best fit between the organization's core culture and the personal qualities and priorities of the individual. Using hard numbers and current studies that prove the direct connection between a company's financial performance and its employees commitment this book is a wake up call to organizations desperately needing to restore the broken spirits at the heart of their companies and enhance their bottom lines.
