Flowers, Butterflies and Insects Maria Sibylla Merian, 1991-01-01 Fine line images of roses butterflies tulips caterpillars and other specimens of plant and insect life in elegant full page compositions These plates are considered among the finest achievements of a great age of floral painting and the engraver's art Reprinted from the classic influential works of the famed artist entomologist Merian 1647 1717 New English captions Maria Sibylla Merian Catherine Powell-Warren, 2025-09-09 This captivating study of the life and career of Maria Sibylla Merian focuses on her artistic output and accomplishments The career and achievements of Maria Sibylla Merian 1647 1717 are well documented A pioneering artist and scientist she spent much of her life innovating across various mediums and disciplines Her curiosity was so strong

that it led her on a journey across the Atlantic Ocean from Europe to South America in pursuit of knowledge. While her status as an entomologist and naturalist has garnered the most attention, Merian has not yet received her full due as an artist. Raised by a family of illustrators and publishers, she learned how to draw, mix paints, create prints, and paint in watercolor from her stepfather, still life expert Jacob Marrel. Her stepfather's attention and tutelage would provide the foundation for her talents to flourish and teach her that her gender was not a barrier to success. In *Maria Sibylla Merian*, author Catherine Powell Warren examines Merian through an art historical lens to better understand her life as a woman and illustrator in the early modern Dutch Republic. This volume highlights Merian's artistic range, financial successes, and historical significance. Considering the obstacles women artists faced in this period, Merian's achievements, namely her management of a successful artists' studio and for-profit workshop, were extraordinary.

Women and the Art and Science of Collecting in Eighteenth-Century Europe Arlene Leis, Kacie L. Wills, 2020-08-31 Through both longer essays and shorter case studies, this book examines the relationship of European women from various countries and backgrounds to collecting in order to explore the social practices and material and visual cultures of collecting in eighteenth-century Europe. It recovers their lives and examines their interests, their methodologies, and their collections, and objects some of which have rarely been studied before. The book also considers women's role as producers, that is, creators of objects that were collected. Detailed examination of the artefacts, both visually and in relation to their historical contexts, exposes new ways of thinking about collecting in relation to the arts and sciences in eighteenth-century Europe. The book is interdisciplinary in its makeup and brings together scholars from a wide range of fields. It will be of interest to those working in art history, material and visual culture, history of collecting, history of science, literary studies, women's studies, gender studies, and art conservation.
