Cyber-Attacks and the Exploitable Imperfections of International Law Yaroslav Radziwill, 2015-07-28. At its current rate, technological development has outpaced corresponding changes in international law. Proposals to remedy this deficiency have been made in part by members of the Shanghai Cooperation Organization led by the Russian Federation but the United States and select allies have rejected these proposals, arguing that existing international law already provides a suitable comprehensive framework necessary to tackle cyber warfare. *Cyber Attacks and the Exploitable Imperfections of International Law* does not contest and in fact supports the idea that contemporary *jus ad bellum* and *jus in bello* in general can accommodate cyber warfare. However, this analysis argues that existing international law contains significant imperfections that can be exploited, gaps not yet filled that fail to address future risks posed by cyber attacks.

The Evolution of Cyber War Brian M. Mazanec, 2015. Former secretary of defense.
