**Inside the BBC and CNN** Lucy Küng,2000 Inside the BBC and CNN provides a unique insight into two of the world's best known media organisations during a period of great change and new challenges The BBC and CNN have very different histories remits and identities but both must now compete to provide news in a media environment being reshaped by increasing competition globalisation digitisation and convergence In addition they face increasing pressures of criticism focussed on the struggle for ratings and the perceived dumbing down of programming Drawing on intensive research carried out among senior managers in both organisations Lucy Küng Shankleman's study explores the beliefs and attitudes that shape management priorities and broadcasting policy More controversially it examines how each organisation's distinct cultural beliefs about broadcasting's fundamental purpose about the nature of competition and about the relationship between competition and quality have laid the foundations for their current and past success but could now threaten to limit their ability to respond to the unprecedented changes underway in the world's media landscape

unprecedented changes underway in the world's media landscape      **Strategic Management in the Media** Lucy Küng, 2016-11-26 Küng's book stands out for its focus on concepts, drivers and dynamics. Its scope and learning are brilliant and dazzling. This updated edition will be a source of insight for students and a tool for industry veterans who seek the perspective of academia. Eli Noam, Columbia Business School. A landmark contribution to scholarship. Küng's excellent book provides an empirically rich and analytically sharp, sighted guide to contemporary organizational strategies in a complex and dynamic media environment. Gillian Doyle, University of Glasgow. In the age of relentless technological disruption, unlimited distribution and non-professionalization, media firms are more dependent than ever on strategic management. Küng articulates the dimensions of media industries to account for an ever-increasing array of challenges and strategies. David Craig, University of Southern California. In this Second Edition of a book many found invaluable for research and teaching, including myself, Küng accomplishes a challenging task to preserve all the best qualities of the First Edition while both extending the scope and deepening understandings about strategic management theory in application to media industries. Gregory Ferrell, Lowe University of Tampere. With the media industries facing unprecedented change and challenge from top to bottom, it has never been more vital to understand the elements of strategy and how they apply to media organizations. This new edition shows innovation, disruption and strategic adaptation in action with a stronger focus on a case-based approach. Takes readers deep into case studies on BuzzFeed, The Guardian, Netflix, the New York Times and the BBC. Explains strategic theory and concepts with insight and clarity. Shows how to understand change and decision making within media organizations. This is the essential guide to change and management in the media industries, ideal for students of media studies, media economics and media management.

**Media Houses** Staffan Ericson, Kristina Riegert, 2010. In much recent theory, the media are described as ephemeral, ubiquitous and de-localized. Yet the activity of modern media can be traced to spatial centers that are tangible enough, some even monumental. This book offers multidisciplinary and historical perspectives on the buildings of some of the world's major media institutions. Paradoxically, as material and aesthetic manifestations of mediated centers of power, they provide sites to the siteless and solidity to the immaterial. The authors analyse the ways that architectural form and organization reflect different eras, media technologies, ideologies and relations with the public in media houses from New York and Silicon Valley to London, Moscow and Beijing.

Media Organization and Production Simon Cottle, 2003-04-18. Drawing on the work of international contributors, *Media Organization and Production* examines a wide range of global, local media organizations and the production of different mediums and genres. Following the editor's introduction, which sets out the principal differences of approach and defining debates, chapters address transnational and national commercial and public service corporations, international film and TV co-productions, children's television, news production, the historical development of liveness on radio and music journalism, the politics and organizational forms of alternative media production, including radical newspapers, video and the internet and the changing production ecology of natural history television. These

topics are examined through a variety of theoretical and conceptual frameworks that help to illuminate how cultural production often involves a complex articulation of differing influences and constraints both material and discursive intended and unintended structurally determined and culturally mediated Together the chapters in this book help to recover this complexity and thereby help us to better understand the nature and output of today's media *Handbook of Social Media Management* Mike Friedrichsen, Wolfgang Mühl-Benninghaus, 2013-05-28 Digitization and Web 2.0 have brought about continuous change from traditional media management to new strategic operative and normative management options Social media management is on the agenda of every media company and requires a new set of specialized expertise on digital products and communication At the same time social media has become a vibrant field of research for media economists and media management researchers In this handbook international experts present a comprehensive account of the latest developments in social media research and management consistently linking classical media management with social media The articles discuss new theoretical approaches as well as empirical findings and applications yielding an interesting overview of interdisciplinary and international approaches The book's main sections address forms and content of social media impact and users management with social media and a new value chain with social media The book will serve as a valuable reference work for researchers students and professionals working in media and public relations The Routledge Companion to Local Media and Journalism Agnes Gulyas, David Baines, 2020-04-19 This comprehensive edited collection provides key contributions in the field mapping out fundamental topics and analysing current trends through an international lens Offering a collection of invited contributions from scholars across the world the volume is structured in seven parts each exploring an aspect of local media and journalism It brings together and consolidates the latest research and theorisations from the field and provides fresh understandings of local media from a comparative perspective and within a global context This volume reaches across national cultural technological and socio-economic boundaries to bring new understandings to the dominant foci of research in the field and highlights interconnection and thematic links Addressing the significant changes local media and journalism have undergone in the last decade the collection explores the history politics ethics and contents of local media as well as delving deeper into the business and practices that affect not only the journalists and media makers involved but consumers and communities as well For students and researchers in the fields of journalism studies journalism education cultural studies and media and communications programmes this is the comprehensive guide to local media and journalism **Media Globalization and the Discovery Channel Networks** Ole J. interweaving of media and communications unfold and develop as well as some of the consequences of this      *Making the News Popular* Anthony M Nadler,2016-06-15 The professional judgment of gatekeepers defined the American news agenda for decades Making the News Popular examines how subsequent events brought on a post professional period that opened the door for imagining that consumer preferences should drive news production and unleashed both crisis and opportunity on journalistic institutions Anthony Nadler charts a paradigm shift from market research s reach into the editorial suite in the 1970s through contemporary experiments in collaborative filtering and social news sites like Reddit and Digg As Nadler shows the transition was and is a rocky one It also goes back much further than many experts suppose Idealized visions of demand driven news face obstacles with each iteration Furthermore the post professional philosophy fails to recognize how organizations mobilize interest in news and public life Nadler argues that this civic function of news organizations has been neglected in debates on the future of journalism Only with a critical grasp of news outlets role in stirring broad interest in democratic life he says might journalism s digital crisis push us toward building a more robust and democratic news media Wide ranging and original Making the News Popular offers a critical examination of an important and still evolving media phenomenon      **Political Discourse in the Media** Anita Fetzer,Gerda Eva Lauerbach,2007-06-27 This book departs from the premise that political discourse is intrinsically connected with media discourse as shaped by its cultural and transcultural characteristics It presents a collection of papers which examine political discourse in the media from a cross culturally comparative perspective in Arab Dutch British Finnish Flemish French German Israeli Swedish US American and international contexts By using different theoretical frameworks such as conversation analysis discourse analysis pragmatics and systemic functional linguistics the papers reflect current moves in political discourse analysis to cross disciplinary and methodological boundaries by integrating semiotics particularly multimodality cognition context genre and recipient design

News Jackie Harrison,2005-11-10 Written in a clear and lively style with examples across a range of media including print radio television and the internet Jackie Harrison explains the different theoretical approaches that have been used to study news      Television News and Human Rights in the US & UK Shawna M. Brandle,2015-12-22 Does the CNN Effect exist Political communications scholars have debated the influence of television news coverage on international affairs since television news began especially in relation to the coverage of massive human rights violations These debates have only intensified in the last 20 years as new technologies have changed the nature of news and the news cycle But despite frequent assertion little research into the CNN Effect or whether television coverage of human rights violations causes state action exists Bridging across the disciplines of human right studies comparative politics and communication studies in a way that has not been done this book looks at television news coverage of human rights in the US and UK to answer the question of whether the CNN Effect actually exists Examining the human rights content in television news in the US and UK yields insights to what television news producers and policy makers consider to be human rights and what if anything audiences

can learn about human rights from watching television news After reviewing 20 years of footage using three different types of content analyses of American television news broadcasts and two different types of British news broadcasts and comparing those results with human rights rankings and print news coverage of human rights Shawns M Brandle concludes that despite rhetoric from both countries in support of human rights there is not enough coverage of human rights in either country to argue that television media can spur state action on human rights issues More simply the violations will not be televised A welcome and timely book presenting an important examination of human rights coverage on television news
