Inspiring Progress Religions Contributions To Sustainable Development:

Inspiring Progress Gary T. Gardner, 2006 Contending that a lack of spiritual and ethical standards directly contributed to violent events in the twentieth century an exploration of what the author believes to be the responsibilities of the world's organized religions argues for the building of environmentally sustainable and socially just societies Original **State of the World 2008** Gary T. Gardner, Worldwatch Institute, 2008 Examines new technologies and advances from around the world that show promise as a means to create a sustainable global economy and stop the depletion of natural resources and the environment State of the World 2007 Worldwatch Institute, 2007 Top ranked annual books on sustainable development GlobeScan survey of sustainability experts Religion Hent de Vries, 2008 What do we talk about when we talk about religion Is it an array of empirical facts about historical human civilizations Or is religion what is in essence unpredictable perhaps the very emergence of the new In what ways are the legacies of religion its powers words things and gestures reconfiguring themselves as the elementary forms of life in the twenty first century Given the Latin roots of the word religion and its historical Christian uses what sense if any does it make to talk about religion in other traditions Where might we look for common elements that would enable us to do so Has religion as an overarching concept lost all its currency or does it ineluctably return sometimes in unexpected ways the moment we attempt to do without it This book explores the difficulties and double binds that arise when we ask What is religion Offering a marvelously rich and diverse array of perspectives it begins the task of rethinking religion and religious studies in a contemporary world Opening essays on the question What is religion are followed by clusters exploring the relationships among religion theology and philosophy and the links between religion politics and law Pedagogy is the focus of the following section Religion is then examined in particular contexts from classical times to the present Pentecostal revival leading into an especially rich set of essays on religion materiality and mediatization The final section grapples with the ever changing forms that religion is taking such as spirituality movements and responses to the ecological crisis Featuring the work of leading scholars from a wide array of disciplines traditions and cultures Religion Beyond a Concept will help set the agenda for religious studies for years to come It is the first of five volumes in a collection entitled The Future of the Religious Past the fruit of a major international research initiative funded by the Netherlands Organization for Scientific Research Recovering Environmental and Economic Traditions in the Islamic World, 2024-10-21 Recovering Environmental and Economic Traditions in the Islamic World is an interdisciplinary volume that interrogates varied approaches to environmental and economic thought in classical Islam and in a few contemporary case studies The contributions in this volume critique the dominant economic system and its perspective on the environment as a commodity across the boundaries of multiple intellectual traditions and academic fields The book analyses both historical trajectories and modern schools of thought while simultaneously exploring ethical applications to environmental and economic discourses as a tool of critique In this context the authors conceptualize and

treat these discourses as polyvalent and enmeshed with various political ethical and cosmological perspectives and vistas

The Bridge at the Edge of the World James Gustave Speth, 2008-01-01 Presents an analysis of modern capitalism and its impact on the global environmental crises and discusses how the transformation of current economic and political systems can lead to environmental sustainability

Traditional Islamic Environmentalism Tarik M. Quadir, 2013-09-16 This work examines the relevance of traditional Islamic thought and practices for a lasting solution to the current environmental crisis Quadir describes how Seyyed Hossein Nasr challenges Muslims to reclaim their traditional intellectual and Sufi heritage as powerful means toward a most thoughtful approach to the crisis In so doing Nasr urges us to take a critical look at the consequences of the worldviews generated by modern science and technology and offers bold solutions for a more caring relationship between man and nature The book argues that only a revival of the traditional worldview which perceives all entities of nature as signs of God can effectively respond to the crisis our planet faces

More Than a Cup of Coffee and Tea David D. Grafton, 2021-06-21 Islamophobia continues to rise among Americans even within progressive mainline churches creating a poisonous and dangerous atmosphere for interfaith relations American Lutherans however have been engaged in dialogue with Islam for over a generation Originally like other Protestant churches Lutherans studied Islam as a monolithic religious system for the purpose of proselytizing the Christian faith Over the years and with experience American Lutherans came to know Islam as a faith tradition of believers in different cultures and contexts By developing relationships with Muslim neighbors some ELCA Lutherans and their international partners have learned that it is possible to witness to the Christian faith and listen to Muslim neighbors for the purpose of understanding and to work for a common cause of justice More Than a Cup of Coffee and Tea documents the Focus on Islam that began in the 1980s among ELCA Lutherans and then reflects on more than a generation of engagement with Muslims in various domestic and international contexts This volume documents where the ELCA has been what it has learned and encourages others to continue to develop positive relationships with Muslim neighbors and communities as a Christian activity and to combat Islamophobia

All God's Animals Christopher Steck, 2019-10-01 The book is the first of its kind to draw together in conversation the views of the early Church contemporary biblical and theological scholarship and post conciliar teachings Steck develops a comprehensive Catholic theology of animals based on an in depth exploration of Catholicism's fundamental doctrines trinitarian theology Christology pneumatology eschatology and soteriology All God's Animals makes two central claims First we can hope that God will include animals of the present age in the kingdom inaugurated by Christ Second because of this inclusion our responses to animals should be guided by the values of the kingdom As Christians await the final liberation of all creation they are to be witnesses to God's kingdom by embodying its ideals in their relations with animal life Because the kingdom's fullness is yet to come and because our world remains marked by the wounds of sin however Christian treatment of animals will at times require acts that are at odds with the kingdom's ideals for example those causing suffering and death Steck examines each of

these ideas and explores all of their complexities *Ecologies of Grace* Willis Jenkins, 2013-02-12 Christianity struggles to show how living on earth matters for living with God While people of faith increasingly seek practical ways to respond to the environmental crisis theology has had difficulty contextualizing the crisis and interpreting the responses In *Ecologies of Grace* Willis Jenkins presents a field shaping introduction to Christian environmental ethics that offers resources for renewing theology Observing how religious environmental practices often draw on concepts of grace Jenkins maps the way Christian environmental strategies draw from traditions of salvation as they engage the problems of environmental ethics He then uses this new map to explore afresh the ecological dimensions of Christian theology Jenkins first shows how Christian ethics uniquely frames environmental issues and then how those approaches both challenge and reinhabit theological traditions He identifies three major strategies for making environmental problems intelligible to Christian moral experience Each one draws on a distinct pattern of grace as it adapts a secular approach to environmental ethics The strategies of ecojustice stewardship and ecological spirituality make environments matter for Christian experience by drawing on patterns of sanctification redemption and deification He then confronts the problems of each of these strategies through critical reappraisals of Thomas Aquinas Karl Barth and Sergei Bulgakov Each represents a soteriological tradition which Jenkins explores as an ecology of grace letting environmental questions guide investigation into how nature becomes significant for Christian experience By being particularly sensitive to the ways in which environmental problems are made intelligible to Christian moral experience Jenkins guides his readers toward a fuller understanding of Christianity and ecology He not only makes sense of the variety of Christian environmental ethics but by showing how environmental issues come to the heart of Christian experience prepares fertile ground for theological renewal **Property Rights and Sustainability** David

Grinlinton, Prue Taylor, 2011-04-11 Published with the support of The New Zealand Law Foundation As collapses and crises involving ecological systems economic and financial management and international governance increase the need for bold alternatives to traditional economic and legal responses has never been more urgent Property concepts are an important element in the interaction between humans and the natural environment An important driver of ecological harm property concepts can also become a powerful tool for responding to ecological problems in ways that have so far eluded both government regulators and markets Going beyond the traditional critiques of liberal property theories *Property Rights and Sustainability* takes on the challenge of fundamentally reconceptualising property rights and systems It makes a significant contribution to rebalancing the legal framework in a way that recognises humanity as a member of a larger ecological order the health and integrity of which is of primary importance to the long term viability of our planet *Property Rights and Sustainability* will be an indispensable resource for those interested in the relationship between property law and the environment and the ways in which property law can be reshaped to respond to the ecological challenges of our time

Grounding Religion Whitney A. Bauman, Richard Bohannon, Kevin J. O'Brien, 2010-10-04 How do religion and the natural

world interact with one another Grounding Religion introduces students to the growing field of religion and ecology exploring a series of questions about how the religious world influences and is influenced by ecological systems Grounding Religion examines the central concepts of religion and ecology using analysis dialogical exchanges by established scholars in the field and case studies The first textbook to encourage critical thinking about the relationships between the environment and religious beliefs and practices it also provides an expansive overview of the academic field of religion and ecology as it has emerged in the past forty years The contributors introduce students to new ways of thinking about environmental degradation and the responses of religious people Each chapter brings a new perspective on key concepts such as sustainability animals gender economics environmental justice globalization and place Discussion questions and contemporary case studies focusing on topics such as Muslim farmers in the US and Appalachian environmental struggles help students apply the perspective to current events other media and their own interests

The Oxford Handbook of Energy and Society Dr. Debra J. Davidson, Dr. Matthias Gross, 2018-07-11 The Oxford Handbook of Energy and Society presents an overview of this expanding area that has evolved dramatically over the past decade away from one largely dominated by structural political economic treatments on the one hand and social psychological studies of individual level attitudes and behaviors on the other toward a far more conceptually and methodologically rich and exciting field that brings in for example social practices system complexity risk theory social studies of science and social movements theories This volume seeks to capture the variety of scales and methods and range of both conceptual and empirical analyses that define the field while drawing particular attention to indigenous peoples poverty political power communities and cities Organized into seven sections chapters cover social theory and energy society relations political economic perspectives consumption dynamics energy equity and energy poverty energy and publics energy and governance as well as emerging trends

Transforming Psychological Worldviews to Confront Climate Change F. Stephan Mayer, 2018-11-06 In the continuing debate of how to confront the challenges of climate change individuals advocacy groups and political parties in the United States offer arguments and solutions based on economic and political viewpoints But what if we are beginning from a distorted view In this book F Stephan Mayer argues that our psychological representation of the world is at the heart of the underlying causes of climate change Mayer posits that we need to change the way we see the world if we are to effectively take a new course of action to address this threat Through an alternative worldview based on Aldo Leopold's concept of land ethic Mayer furthers the conversation by promoting a clearer vision of our relationship to nature and how it leads to a different path directed toward environmental sustainability Based on over 20 years of psychological research examining the impact of the land ethic on pro environmental behavior and personal well being Mayer's accessible tone invites readers to place their worldview within a broader framework draw connections to their lives and spark ideas of next steps that individuals and groups can take to transition to this alternative worldview and rectify this situation Asian Perspectives on

the World's Religions after September 11 Arvind Sharma, Madhu Khanna, 2013-02-15 This book offers a unique perspective on September 11 and our world after this tragic event sharing lessons from an Asian religious experience that can help heal a world troubled by religious conflicts and deepening divisions and promote a positive global transformation Existing literature regarding the events of September 11 and our world afterward has focused mostly on the West and the Middle East Asian Perspectives on the World's Religions after September 11 extends this discussion to include Asia a continent and culture far too important to be ignored in any assessment of the global impact of this event The book is organized along the following themes as they emerged post September 11th religion and civilizational dialogue religion conflict and peace religion and human rights religion and ethics religion and the arts religion hermeneutics and literature religion and gender religion and ecology and religion and globalization Individuals who are studying or teaching political science international relations philosophy ethics Asian studies or religious studies will find the text invaluable while general readers will appreciate the largely unvoiced Asian perspective on this topic

Socially Responsible Investment Law Benjamin J Richardson, 2008-06-30 Environmental harm is commonly associated with companies that extract consume and pollute our shared natural resources Rarely are the unseen polluters the financiers that sponsor and profit from eco damaging corporations placed at the forefront of the environmental debate By focusing on these unseen polluters Benjamin Richardson provides a comprehensive examination of socially responsible investment SRI and offers a guide to possible reform Richardson proposes that greater regulatory supervision of SRI will help ensure that the financial sector prioritizes ethically based investments In Socially Responsible Investment Law he suggests that new governmental reforms should encourage companies to participate in socially responsible investments by providing a better mix of standards and incentives for SRI through measures that include redefining the fiduciary responsibilities of institutional investors to incorporate environmental concerns By doing so Richardson posits that corporate financiers including banks hedge funds and pension plans will become more accountable to the goals of ensuring sustainable development

Ecotheology in the Humanities Melissa Broton, 2016-05-20 This book is a collection of essays about the interaction between God humans and nature in the context of the environmental challenges and Biblical studies Chapters include topics on creation care and Sabbath sacramental approaches to earth care classical and medieval cosmologies ecotheodicy how we understand the problem of nonhuman suffering in a world controlled by a good God ecojustice and how humans help to alleviate nonhuman suffering The book seeks to provide a way to understand Judeo Christian perspectives on human to nonhuman interaction through Biblical literary cultural film and music studies and as such offers an interdisciplinary approach with emphasis on the humanities which provides a broader platform for ecotheology

The Routledge Handbook of Democracy and Sustainability Basil Bornemann, Henrike Knappe, Patrizia Nanz, 2022-02-22 This handbook provides comprehensive and critical coverage of the dynamic and complex relationship between democracy and sustainability in contemporary theory discourse and practice Distinguished scholars from different disciplines such as

political science sociology philosophy international relations look at the present state of this relationship asking how it has evolved and where it is likely to go in the future They examine compatibilities and tensions continuities and changes as well as challenges and potentials across theoretical empirical and practical contexts This wide spanning collection brings together multiple established and emerging viewpoints on the debate between democracy and sustainability which have until now been fragmented and diffuse It comprises diverse theoretical and methodological perspectives discussing democracy's role in and potential for coping with environmental issues at the local and global scales This handbook provides a comprehensive overview of arguments claims questions and insights that are put forward regarding the relationship between democracy and sustainability In the process it not only consolidates and condenses but also broadens and captures the many nuances of the debate By showing how theoretical empirical and practical accounts are interrelated focusing on diverse problem areas and spheres of action it serves as a knowledge source for professionals who seek to develop action strategies that do justice to both sustainability and democracy as well as providing a valuable reference for academic researchers lecturers and students

The Earth Cries Out Gardner, Gary ,2021-06-16 *The Earth Cries Out* describes best practices in religious responses to the impending climate and sustainability emergency and presents the next steps for faith communities in the years ahead

Ethical Principles and Economic Transformation - A Buddhist Approach Laszlo Zsolnai,2011-05-17 Buddhism points out that emphasizing individuality and promoting the greatest fulfillment of the desires of the individual conjointly lead to destruction The book promotes the basic value choices of Buddhism namely happiness peace and permanence Happiness research convincingly shows that not material wealth but the richness of personal relationships determines happiness Not things but people make people happy Western economics tries to provide people with happiness by supplying enormous quantities of things and today's dominating business models are based on and cultivates narrow self centeredness But what people need are caring relationships and generosity Buddhist economics makes these values accessible by direct provision Peace can be achieved in nonviolent ways Wanting less can substantially contribute to this endeavor and make it happen more easily Permanence or ecological sustainability requires a drastic cutback in the present level of consumption and production globally This reduction should not be an inconvenient exercise of self sacrifice In the noble ethos of reducing suffering it can be a positive development path for humanity
