- **STATIC DISCHARGE:** Climates in some parts of the world are conducive to creating static electric build up (ESD). Your digital manifold has been designed to eliminate the damaging effects of ESD. In some extreme cases, ESD will be apparent on your digital manifold by a lack of response or an inability to turn off the unit. In the rare case that this occurs, simply disconnect the battery, wait 1 minute and reconnect the battery. The digital manifold will "reboot" itself and operate normally once the unit is turned on.

BATTERY CARE & INSTALLATION

When the battery is connected to the unit but not in use it will last six months.

NOTE: In order to prolong the life of the 9V battery;

- keep auto-off function enabled
- if pressure, temperature or deep vacuum is being used for an extended period of time turn the unit off and turn back on again when reading is required. (Allow 30-45 seconds for the correct reading to appear.)
