Educational Screen and Audiovisual Guide ,1940 *Failure to Disrupt* Justin Reich,2020-09-15 A Science Reading List for Uncertain Times Selection A must read for anyone with even a passing interest in the present and future of higher education Tressie McMillan Cottom author of *Lower Ed* A must read for the education invested as well as the education interested Forbes Proponents of massive online learning have promised that technology will radically accelerate learning and democratize education Much publicized experiments often underwritten by Silicon Valley entrepreneurs have been launched at elite universities and elementary schools in the poorest neighborhoods But a decade after the year of the MOOC the promise of disruption seems premature In *Failure to Disrupt* Justin Reich takes us on a tour of MOOCs autograders intelligent tutors and other edtech platforms and delivers a sobering report card Institutions and investors favor programs that scale up quickly at the expense of true innovation Learning technologies even those that are free do little to combat the growing inequality in education Technology is a phenomenal tool in the right hands but no killer app will shortcut the hard road of institutional change I m not sure if Reich is as famous outside of learning science and online education circles as he is inside He should be Reading and talking about *Failure to Disrupt* should be a prerequisite for any big institutional learning technology initiatives coming out of COVID 19 Inside Higher Ed The desire to educate students well using online tools and platforms is more pressing than ever But as Justin Reich illustrates many recent technologies that were expected to radically change schooling have instead been used in ways that perpetuate existing systems and their attendant inequalities Science

Gardening Will Bonsall,2015 Society does not generally expect its farmers to be visionaries Perhaps not but longtime Maine
 farmer and homesteader Will Bonsall does possess a unique clarity of vision that extends all the way from the finer points of
 soil fertility and seed saving to exploring how we can transform civilization and make our world a better more resilient place
 In Will Bonsall s Essential Guide to Radical Self Reliant Gardening Bonsall maintains that to achieve real wealth we first need
 to understand the economy of the land to realize that things that might make sense economically don t always make sense
 ecologically and vice versa The marketplace distorts our values and our modern dependence on petroleum in particular
 presents a serious barrier to creating a truly sustainable agriculture For him the solution is first and foremost greater self
 reliance especially in the areas of food and energy By avoiding any off farm inputs fertilizers minerals and animal manures
 Bonsall has learned how to practice a purely veganic or plant based agriculture not from a strictly moralistic or philosophical
 perspective but because it makes good business sense spend less instead of making more What this means in practical terms
 is that Bonsall draws upon the fertility of on farm plant materials compost green manures perennial grasses and forest
 products like leaves and ramial wood chips And he grows and harvests a diversity of crops from both cultivated and perennial
 plants vegetables grains pulses oilseeds fruits and nuts even uncommon but useful permaculture plants like groundnut Apios
 In a friendly almost conversational way Bonsall imparts a wealth of knowledge drawn from his more than forty years of
 farming experience My goal he writes is not to feed the world but to feed myself and let others feed themselves If we all did

that it might be a good beginning
