Proceedings of the 23rd European Conference on e-Learning Fernando Moriera, **Fuzzy And Neural Approaches in Engineering** Lefteri H. Tsoukalas, Robert E. Uhrig, 1997-02-05 Provides a truly accessible introduction and a fully integrated approach to fuzzy systems and neural networks the definitive text for students and practicing engineers Researchers are already applying neural networks and fuzzy systems in series from the use of fuzzy inputs and outputs for neural networks to the employment of individual neural networks to quantify the shape of a fuzzy membership function But the integration of these two fields into a neurofuzzy technology holds even greater potential benefits in reducing computing time and optimizing results Fuzzy and Neural Approaches in Engineering presents a detailed examination of the fundamentals of fuzzy systems and neural networks and then joins them synergistically combining the feature extraction and modeling capabilities of the neural network with the representation capabilities of fuzzy systems Exploring the value of relating genetic algorithms

and expert systems to fuzzy and neural technologies this forward thinking text highlights an entire range of dynamic possibilities within soft computing With examples specifically designed to illuminate key concepts and overcome the obstacles of notation and overly mathematical presentations often encountered in other sources plus tables figures and an up to date bibliography this unique work is both an important reference and a practical guide to neural networks and fuzzy systems
