Oliver Lah,2018-12-03 Sustainable Urban Mobility Pathways examines how sustainable urban mobility solutions contribute to achieving worldwide sustainable development and global climate change targets while also identifying barriers to implementation and strategies to overcome them Building on city to city cooperation experiences in Europe Asia Africa and Latin America the book examines key challenges in the context of the Paris Agreement UN Sustainable Development Goals and the New Urban Agenda including policies needed to achieve a sustainable low carbon pathway for transport and how an integrated policy strategy is designed to provide a basis for political coalitions The book explores which institutional framework creates sufficient political stability and continuity to foster the take up of and long term support for sustainable transport strategies The linkages of climate change and wider sustainable development objectives are covered including success stories best practices and quantitative analysis for key emerging economies in public transport walking cycling freight and logistics vehicle technology and fuels urban planning and integration and national framework policies Provides a holistic view of sustainable urban transport focusing on policy making processes the role of institutions and successes and pitfalls Delivers practical insights drawn from the experiences of actual city to city cooperation and on the ground policy work Explores options for the integration of policy objectives and institutional structures that form coalitions for the

implementation of sustainable urban mobility solutions Describes the policy institutional political and socio economic aspects in cities in five emerging economies Brazil China India Mexico and Turkey *Green City Development Tool Kit* Asian Development Bank,2015-09-01 The term Green City has many different meanings to different people There is no universal solution that can be applied to every city Adaptable responsive and innovative solutions that differ from one place to another enable Green Cities to emerge in various forms and enable us to recognize the variation and dynamism of cities Green Development considers how to improve and manage the overall quality and health of water air and land in urban spaces its correlation with hinterlands and wider systems and the resultant benefits derived by both the environment and residents This tool kit is a reference for Asian Development Bank staff consultants and city leaders that introduces key concepts of Green City development and identifies crosscutting issues that help in designing urban programs to support city development in a green and sustainable manner It outlines a three step city assessment framework and provides a summary of existing tools and resources for green and sustainable development *Sustainable Transport Development, Innovation and Technology* Michał Suchanek,2017-03-27 This proceedings volume presents current research on transport sector development with particular emphasis on sustainable transport development innovation and transport enterprise growth and survival Derived from the 2016 TranSopot Conference held in Sopot Poland this book aims to show the possibilities of maximizing the efficiency of transport while keeping the negative effects at a sustainable level Transport is an important field of human activity both from economic and social points of view It has been proven that the development of transport contributes to the development of regional national and international economic relations Currently the three most important topics in transportation research are green transport transport innovations and metropolitan transport These are the areas in which the contributions presented in this book are focused Researchers in the field of sustainable transport provide the reader with a comprehensive description of possible activities towards green transport both in the terms of various transport branches and in the supply chain as a whole This is the framework of the second field of transport research innovation The authors present a wide array of a technological organizational process and marketing innovation which allow transport organizers and operators to provide service in a safe sound and economically favorable way The analysis of these innovations and the practical implications of their introduction should be a worthwhile experience both for the transport researchers and for the transport business practitioners Lastly the book reflects the tendencies of rapid development in urban and metropolitan areas which forces transport policy makers to provide citizens with a comfortable and faster way of commuting that doesn't result in unacceptable congestion or other negative effects Different concepts of metropolitan transport management are presented and their effect on the transport systems is also investigated **Motor Vehicles, the Environment, and the Human Condition** Hans A. Baer,2019-10-09 The world now has more than a billion motor vehicles and this number continues to increase as developing countries imitate developed societies in their adoption of the culture of automobility This

book explores the political ecology of motor vehicles in an era of growing social disparities and environmental crises the latter of which are most manifest in anthropogenic climate change to which motor vehicles constitute a major contributor A political ecological perspective recognizes that motor vehicles perhaps more than any other machine embody the social structural cultural and environmental contradictions of the capitalist world system In addition to highlighting many of the environmental social and health environmental consequences of humanity s increasing reliance on motor vehicles particularly private automobiles this book argues that ultimately we need as a species to move beyond motor vehicles as much as possible but that such an effort will have be part and parcel of creating an alternative world system based on social justice democratic processes environmental sustainability and a safe climate one termed democratic eco socialism *Global Capitalism and Climate Change* Hans A. Baer,2021-10-01 Now in its second edition *Global Capitalism and Climate Change The Need for an Alternative World System* examines anthropogenic climate change in the context of global capitalism a political economy that emphasizes profit making is committed to on going economic growth results in massive social inequality fosters a treadmill of production and consumption and is heavily reliant on fossil fuels Looking ahead Hans A Baer explores the systemic changes necessary to create a more socially just democratic and environmentally sustainable world system capable of moving humanity toward a safer climate This book is recommended for readers interested in anti systemic efforts including eco anarchism eco feminism the de growth perspective Indigenous voices and the climate justice movement
