Research Questions Mats Alvesson,Jorgen Sandberg,2013-02-28 All researchers want to produce interesting and influential
theories A key step in all theory development is formulating innovative research questions that will result in interesting and
significant research Traditional textbooks on research methods tend to ignore or gloss over actual ways of constructing
research questions In this text Alvesson and Sandberg develop a problematization methodology for identifying and
challenging the assumptions underlying existing theories and for generating research questions that can lead to more
interesting and influential theories using examples from across the social sciences Established methods of generating
research questions in the social sciences tend to focus on gap spotting which means that existing literature remains largely
unchallenged The authors show the dangers of conventional approaches providing detailed ideas for how one can work
through such problems and formulate novel research questions that challenge existing theories and produce more
imaginative empirical studies Constructing Research Questions is essential reading for any researcher looking to formulate
research questions that are interesting and novel **The School Journal** ,1904 **Hearings** United States. Congress.
