Relationships in Marriage and the Family Nick Stinnett, James Walters, Evelyn Kaye, 1984

California. Court of Appeal (1st Appellate District). Records and Briefs California (State)., **The Gay & Lesbian Marriage & Family Reader** Jennifer M. Lehmann, 2001 Penetrating articles for people who want to accurately understand the major issues gays and lesbians face that involve marriage and family life in 21st century America

Counted Out Brian Powell, Catherine Blozendahl, Claudia Geist, Lala Carr Steelman, 2010-09-01 When state voters passed the California Marriage Protection Act Proposition 8 in 2008 it restricted the definition of marriage to a legal union between

a man and a woman The act's passage further agitated an already roiling national debate about whether American notions of family could or should expand to include for example same sex marriage unmarried cohabitation and gay adoption But how do Americans really define family The first study to explore this largely overlooked question Counted Out examines currents in public opinion to assess their policy implications and predict how Americans definitions of family may change in the future Counted Out broadens the scope of previous studies by moving beyond efforts to understand how Americans view their own families to examine the way Americans characterize the concept of family in general The book reports on and analyzes the results of the authors Constructing the Family Surveys 2003 and 2006 which asked more than 1 500 people to explain their stances on a broad range of issues including gay marriage and adoption single parenthood the influence of biological and social factors in child development religious ideology and the legal rights of unmarried partners Not surprisingly the authors find that the standard bearer for public conceptions of family continues to be a married heterosexual couple with children More than half of Americans also consider same sex couples with children as family and from 2003 to 2006 the percentages of those who believe so increased significantly up 6 percent for lesbian couples and 5 percent for gay couples The presence of children in any living arrangement meets with a notable degree of public approval Less than 30 percent of Americans view heterosexual cohabitating couples without children as family while similar couples with children count as family for nearly 80 percent Counted Out shows that for most Americans however the boundaries around what they define as family are becoming more malleable with time Counted Out demonstrates that American definitions of family are becoming more expansive Who counts as family has far reaching implications for policy including health insurance coverage end of life decisions estate rights and child custody Public opinion matters As lawmakers consider the future of family policy they will want to consider the evolution in American opinion represented in this groundbreaking book A Volume in the American Sociological Association's Rose Series in Sociology Encyclopedia of Marriage and the Family David Levinson, 1995 Provides a compendium of knowledge about marriage family and human relations **Sociological Abstracts** Leo P.
