Innovation in Environmental Policy? Andrew Jordan, Andrea Lenschow, 2009-01-01 offering an enjoyable read in comparative politics and policy it offers a point of reference for understanding the conceptual and empirical possibilities for further research in EPI Darren McCauley West European Politics a bank of internationally based case studies written by leading environmental experts The Environmentalist The organisation of this book is exemplary particularly for an edited volume A n impressive intellectual contribution to the understanding of EPI I strongly recommend it to scholars and students and crucially also to politicians and civil servants who have attempted or half attempted the task of remedying the historical neglect of environmental issues Ian Bailey Environment and Planning C Good social science may not raise our spirits but it should improve our policy understanding Andrew Jordan and Andrea Lenschow have produced a volume that provides a subtle and empirically informed understanding of environmental policy integration using a design that looks both at the full policy cycle and at cross national comparisons From the foreword by Albert Weale FBA University of Essex UK Policy coordination is normally studied in hierarchical and institutional terms This volume demonstrates the power of an idea to function as a framework for coordination It offers an innovative study of policy coordination as well as a thorough study of environmental policy Guy Peters University of Pittsburgh US This book deals with a critical challenge facing modern governments how to integrate environmental thinking into all policy areas It provides fascinating insights into the progress made in realizing this objective and is a must read for anyone interested in understanding how far we have come and how far we still have to go in greening government for sustainable development James Meadowcroft Carleton University Canada This collection brings together leading scholars in the field to explore the origins and applications of different instruments of environmental policy integration from a comparative perspective This book is a must read for environmental policy practitioners and scholars with an interest in how environmental outcomes can and are being improved Miranda A Schreurs Freie Universit t Berlin Germany Environmental Policy Integration EPI is an innovative policy principle designed to deliver sustainable development This book offers an unrivalled exploration of its conceptualization and implementation drawing upon a set of interlinked case studies of the most common implementing instruments and the varied experience of applying them in six OECD states and the EU Written by a team of international experts it identifies and explains broad patterns and dynamics in what is an important area of contemporary environmental policy analysis This insightful account of the state of the art aims to offer a valuable resource for academics interested in environmental politics and policy analysis as well as the broader interdisciplinary theme of governance for sustainable development It will interest advanced undergraduate and postgraduate students taking courses in comparative politics public administration and environmental politics and policy making Given the continuing political relevance of sustainability it should also appeal to NGOs think tanks and international bodies attempting to coordinate policies across and within different levels of governance European Energy Policy

Francesc Morata, Israel Solorio Sandoval, 2012 This book analyses a highly important topic It is based on a comprehensive and empirically rich assessment of European energy policy including both internal and external determinants Its encompassing approach and the thoughtful combination of different analytical perspectives makes the book an important and fresh contribution to the field Christoph Knill University of Konstanz Germany Energy was one of the founding pillars of European integration while environmental concerns have become an identity sign of today s European Union energy policy However notwithstanding the obvious links between both issues little attention has been devoted to the complex relationship between the EU s environmental performance and the Europeanization of its energy policy This book carefully edited by Morata and Solorio has come to fill this gap becoming a must to understand the interactions between these two fundamental drivers of EU policies Jos Mar a Mar n Quemada Universidad Nacional de Educaci n a Distancia and Member of the Governing Council of the Spanish Central Bank Spain This path breaking book explores the new European energy policy highlighting the significance of environmental policy concerns instruments and objectives vis vis competing security and market dimensions in order to achieve an all embracing EU energy policy perspective for the future While the past years have witnessed unprecedented development of EU energy policy the understanding of this process has lagged behind Alongside the scarce literature on this emergent policy there is also a gap regarding the attention paid to its different components The study stems from the perception of a mismatch between the valuable debate that certain dimensions of energy policy namely energy security and the market and competition framework have triggered and the neglect of its environmental and climate change dimensions European Energy Policy will prove to be insightful for academics and postgraduate students interested in European integration political science international relations public policy and environmental science Energy stakeholders and governmental policymakers will also find plenty of invaluable information in this enriching resource

Embedding sustainable development across Government, after the Secretary of State's announcement on the future of the Sustainable Development Commission Great Britain: Parliament: House of Commons: Environmental Audit Committee, 2011-01-10. Funding of the Sustainable Development Commission (SDC) will cease at the end of March 2011 and Defra's capability and presence to improve the sustainability of Government will be increased. Whilst regretting the Government's decision to stop funding the SDC, the Committee sees an opportunity to reassess and revitalise the architecture for delivering sustainable development. The experience of SDC's work within Government departments to improve their sustainability skills and performance is at risk of being lost so the Government must ensure that this knowledge and expertise is absorbed by departments. Sustainable development needs to be driven from the centre of Government by a Minister and department with Whitehall-wide influence. They must be capable of holding all departments to account for their sustainable development performance. The Committee does not think Defra is best placed to lead this drive and recommends that the Cabinet Office assume this role. And the Treasury could use its position to continue to develop sustainability reporting by departments, strengthen the system of impact assessments and the Green Book investment appraisal methodology for policy making and embed the results of the Government Economic Service review of the economics of sustainability and environmental valuation into those impact assessments and appraisals. Greater political leadership from the top should be brought to bear. The Government must introduce a full set of indicators to measure sustainable development that can be used to develop policy and must provide a new strategic underpinning for its commitment to sustainable development as an overarching goal of Government policy making.
